

Chapter 2: Cell Biology and Organization

Basic:

- Cells are basic units of living organisms
- All organisms are made up of one/ more cells
- Cells consist of protoplasm:
 - Made up of cytoplasm & nucleus
 - Surrounded by thin layer: plasma membrane
 - Consist of small structure: organelles [usually can be seen under electron microscope]
 - Example of non-organelle structure in cell: plasma membrane, cytoplasm, cell wall [in plant]
 - Example of organelle structure in cell: nucleus, endoplasmic reticulum, mitochondrion, ribosome, Golgi apparatus, vacuole, chloroplast [plant cell]

Organelle Component

Nucleus

- Control all activities of cell
- Nucleolus: synthesis of ribosome & RNA [ribonucleic acid]
- Chromosome: carry genetic material which is transferred from parent to the offspring
- **Cell without nucleus: mature red blood cell [RBC]**

Figure 1 Nucleus (open source image from: www.wikipedia.com)

Mitochondria

- Site of cellular respiration
- Help oxidize glucose to release energy in the form of ATP [adenosine triphosphate]
- **** Abundance in sperm, muscle, plant meristem cell [in shoot, root tips]**

Figure 1

Endoplasmic reticulum

- a) RER [rough endoplasmic reticulum]
- Has ribosome on its surface
 - Synthesize by ribosome
- b) SER [smooth endoplasmic reticulum]
- Smooth surface – no ribosome on its surface
 - Centre for drug detoxification

Golgi apparatus

- Help in processing, packaging, transporting macromolecules: protein, carbohydrates

Design Research in Architecture Murray Fraser,2021-07-28 What is the role of design research in the types of insight and knowledge that architects create That is the central question raised by this book It acts as the introductory overview for Ashgate s major new series Design Research in Architecture which has been created in order to establish a firm basis for this emerging field of investigation within architecture While there have been numerous architects scholars since the Renaissance who have relied upon the interplay of drawings models textual analysis intellectual ideas and cultural insights to scrutinise the discipline nonetheless until recently there has been a reluctance within architectural culture to acknowledge and accept the role of design research as part of the discourse However in many countries around the world one of the key changes in architecture and architectural education over the last decade has been the acceptance of design as a legitimate research area in its own right and this new series provides a forum where the best proponents of architectural design research can publish their work This volume provides a broad overview on design research that supports and amplifies the different volumes coming out in the book series It brings together leading architects and academics to discuss the more general issues involved in design research At the end there is an Indicative Bibliography which alludes to a long history of architectural books which can be seen as being in the spirit of design research
