Late Fascism Alberto Toscano, 2023-10-24 The rich archive of twentieth century debates on fascism can steer a path through an increasingly authoritarian present Developing anti fascist theory is an urgent and vital task From the Great Replacement to campaigns against critical race theory and gender ideology today s global far right is launching lethal panics about the threats to traditional political sexual and racial hierarchies Drawing especially on Black radical and anti colonial theories of fascism Toscano makes clear the limits of associating

fascism primarily with the kind of political violence experienced by past European regimes Rather than looking for analogies from history we should see fascism as a mutable process one anchored in racial and colonial capitalism which both predates and survives its crystallization in Mussolini s Italy and Hitler s Germany It is a threat that continues to evolve in the present day

The Place with No Edge Adam Mandelman,2020-04-08 In *The Place with No Edge* Adam Mandelman follows three centuries of human efforts to inhabit and control the lower Mississippi River delta the vast watery flatlands spreading across much of southern Louisiana He finds that people s use of technology to tame unruly nature in the region has produced interdependence with rather than independence from the environment Created over millennia by deposits of silt and sand the Mississippi River delta is one of the most dynamic landscapes in North America From the eighteenth century establishment of the first French fort below New Orleans to the creation of Louisiana s Coastal Master Plan in the 2000s people have attempted to harness and master this landscape through technology Mandelman examines six specific interventions employed in the delta over time levees rice flumes pullboats geophysical surveys dredgers and petroleum cracking He demonstrates that even as people seemed to gain control over the environment they grew more deeply intertwined with and vulnerable to it The greatest folly Mandelman argues is to believe that technology affords mastery Environmental catastrophes of coastal land loss and petrochemical pollution may appear to be disconnected but both emerged from the same fantasy of harnessing nature to technology Similarly the levee system s failures and the subsequent deluge after Hurricane Katrina owe as much to centuries of human entanglement with the delta as to global warming s rising seas and strengthening storms *The Place with No Edge* advocates for a deeper understanding of humans relationship with nature It provides compelling evidence that altering the environment whether to make it habitable profitable or navigable inevitably brings a response sometimes with unanticipated consequences Mandelman encourages a mindfulness of the ways that our inventions engage with nature and a willingness to intervene in responsible respectful ways
