Research for Educational Change Jill Adler,Anna Sfard,2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

The Problem with Education Technology Ben Fink,Robin Brown,2016-02-02 Education is in crisis at least so we hear And at the center of this crisis is technology New technologies like computer based classroom instruction online K 12 schools MOOCs massive open online courses and automated essay scoring AES may be our last great hope or the greatest threat we have ever faced In The Problem with Education Technology Ben Fink and Robin Brown look behind the hype to explain the problems and potential of these technologies Focusing on the case of automated essay scoring they explain the technology how it works and what it does and doesn t do They explain its origins its evolution both in the

classroom and in our culture and the controversy that surrounds it Most significantly they expose the real problem the complicity of teachers and curriculum builders in creating an education system so mechanical that machines can in fact often replace humans and how teachers students and other citizens can work together to solve it Offering a new perspective on the change that educators can hope organize and lobby for The Problem with Education Technology challenges teachers and activists on our side even as it provides new evidence to counter the profit making labor saving logics that drive the current push for technology in the classroom
