Grade Economics Memorandum For November 2014:

The Decline of America David D. Schein, 2018-02-13 The Decline of America offers a carefully documented analysis of the last seventeen U S presidents These men eight Democrats and nine Republicans have shaped the last 100 years not only for America but for the world Each president is profiled with unsparing scrutiny so we can see where it s all gone wrong David Schein follows these critiques by proposing ways to improve America s outlook for the next 100 years before it s too late

The Political Economy of Brain Drain and Talent Capture Adam Tyson, 2018-10-10 Brain drain and talent capture are important issues globally and especially crucial in countries such as Malaysia and Singapore which aspire to be innovation driven advanced economies This book provides a thorough analysis of the impact of brain drain on middle income Malaysia and high income Singapore where the political salience of the problem in both countries is high It discusses the wider issues associated with brain drain such as when rich countries increase their already plentiful stocks of for example medical practitioners and engineers at the expense of relatively poor countries examines the policies put in place in Malaysia and Singapore to counter the problem and explores how the situation is further complicated in Malaysia and Singapore because of these countries extensive state interventionism and sociopolitical tensions and hierarchies based on ethnicity religion and nationality Overall the book contends that talent enrichment initiatives serve to construct and secure privilege and ethnic hierarchy within and between countries as well as to reinforce the political power base of governments

The Report: Indonesia 2015 Oxford Business Group, 2015-05-21 With the application of the right policies Indonesia could return to growth above 6% and perhaps eventually reach the 7% target set by the new president The government intends to double expenditure in the key areas of public works transport and agriculture and new plans include the construction of 2600 km of roads 15 airports 24 ports 3258 km of railway and the addition of around 35 000 MW to the state electricity company s current capacity The investments to be made in infrastructure have the potential to boost the economy in both the short and long term A shift to more investment and less consumption would help lead to more sustainable growth and insulate the country from external shocks Already the numbers are starting to head in the right direction

Capital and the Common Good Georgia Levenson Keohane, 2016-09-27 Despite social and economic advances around the world poverty and disease persist exacerbated by the mounting challenges of climate change natural disasters political conflict mass migration and economic inequality While governments commit to addressing these challenges traditional public and philanthropic dollars are not enough Here innovative finance has shown a way forward by borrowing techniques from the world of finance we can raise capital for social investments today Innovative finance has provided polio vaccines to children in the DRC crop insurance to farmers in India pay as you go solar electricity to Kenyans and affordable housing and transportation to New Yorkers It has helped governmental commercial and philanthropic resources meet the needs of the poor and underserved and build a more sustainable and inclusive prosperity Capital and the Common Good shows how market failure in one context can

be solved with market solutions from another an expert in securitization bundles future development aid into bonds to pay for vaccines today an entrepreneur turns a mobile phone into an array of financial services for the unbanked and policy makers adapt pay for success models from the world of infrastructure to human services like early childhood education maternal health and job training Revisiting the successes and missteps of these efforts Georgia Levenson Keohane argues that innovative finance is as much about incentives and sound decision making as it is about money When it works innovative finance gives us the tools motivation and security to invest in our shared future *Minerals Yearbook* Geological

transition from communism two decades ago the Mongolian economy has experienced rapid liberalisation Sectors including ICT and insurance are expanding quickly and while the mining sector has been responsible for making Mongolia a rising star in the global economy there is great potential for further growth in all economic sectors Politically stable and rich with natural resources Mongolia has emerged as a bellwether for investor confidence in recent years The 2013 commercialisation of the Oyu Tolgoi gold and copper mine is helping to diversify Mongolia s mineral exports away from coal while the government is working to improve the investment environment by adopting the new Investment Law among other measures

Challenges do exist however from the long harsh winters that slow construction to the difficulty of connecting the sparsely populated nation through ICT and transport systems In response the government has partnered with the private sector on a number of fronts in order to promote economic diversification and competitiveness Corruption and Government Susan Rose-Ackerman, Bonnie J. Palifka, 2016-03-07 The second edition of Corruption and Government updates Susan Rose Ackerman s 1999 book to address emerging issues and to rethink old questions in light of new data The book analyzes the research explosion that accompanied the fall of the Berlin Wall the founding of Transparency International and the World Bank s decision to give anti corruption policy a key place on its agenda Time has vindicated Rose Ackerman s emphasis on institutional reform as the necessary condition for serious progress The book deals with routine payoffs and with corruption in contracting and privatization It gives special attention to political corruption and to instruments of accountability The authors have expanded the treatment of culture as a source of entrenched corruption and added chapters on criminal law organized crime and post conflict societies The book outlines domestic conditions for reform and discusses international initiatives including both explicit anti corruption policies and efforts to constrain money laundering *2017 Report to Congress of the U.S.-China Economic and Security Review Commission, November 2017, 115-1* ,2018
