Kyllonen, Richard D. Roberts, Lazar Stankov, 2008 This volume presents research from a variety of perspectives on the enhancement of human intelligence It is organized around five themes enhancement via instruction enhancement via development over the life cycle enhancement over time enhancement via new constructs and new directions in enhancement Three key issues are addressed First although most of the scientific research on intelligence has concerned what it is this volume attends to the consequential societal and economic issue concerns of whether it can be increased and how Second intellectual enhancement is particularly important when targeted to minorities and the poor groups that have typically performed relatively less well on intelligence and achievement measures

This volume reflects the education community's ongoing interest in understanding and attempting to close achievement or test score gaps. Third, most of the attention to examining intellectual enhancement and in accounting for and closing the test score gap has focused on general cognitive ability. In line with the current emphasis on considering intelligence from a wider perspective, this volume includes constructs such as emotional and practical intelligence in definitions of intellectual functioning. *Extending Intelligence Enhancement and New Constructs* is an essential volume for researchers, students, and professionals in the fields of educational psychology, intelligence, educational measurement and assessment, and critical thinking. **Science, Technology & Society**, 2001. *Encyclopedia of Educational Psychology* Neil J. Salkind, Kristin Rasmussen, 2008-01-17. And within these different disciplines, many other fields are featured, including psychology, anthropology, education, sociology, public health, school psychology, counseling, history, and philosophy. In fact, when taught at the college or university level, educational psychology is an ambitious course that undertakes the presentation of many different topics all tied together by the theme of how the individual can best function in an educational setting, loosely defined as anything from pre-school through adult education.
