WATER: THE KEY TO NEW ENERGY Moray B. King, 2017-12-03 Physicist King expands with diagrams on how zero point water energy can be used with the tremendous fluctuations of electrical field energy embedded within the fabric of space King explains how gas emitted from popular water electrolyzer projects manifests unusual energetic anomalies which include vaporizing tungsten when used in a welding torch and running internal combustion engines on small quantities of the gas Some claim to run generators in closed loop fashion solely on the gas from the electrolyzer which is powered solely from the generator Most investigators believe the energy comes from burning hydrogen A hypothesis is proposed that the dominant energy does not come from hydrogen but rather it comes from charged water gas clusters which activate and coherently trap zero point energy Cavitating the water in the electrolyzers appears to maximize gas and energy production Packed with diagrams patents and photos
