School Efficiency Henry Eastman Bennett, 1917

Tools for Teaching Barbara Gross Davis, 2009-07-17 This is the long awaited update on the bestselling book that offers a

practical accessible reference manual for faculty in any discipline This new edition contains up to date information on technology as well as expanding on the ideas and strategies presented in the first edition It includes more than sixty one chapters designed to improve the teaching of beginning mid career or senior faculty members The topics cover both traditional tasks of teaching as well as broader concerns such as diversity and inclusion in the classroom and technology in educational settings

Achieving Balance through Efficiency Stephen Demeo, 2020-01-01 Those starting a career in teaching will put in an incredible amount of energy into their practice in order to learn their craft and become respected professionals In many cases however this energy is not enough to survive as a teacher Currently 1 in 5 new teachers will leave the profession after five years The purpose of this book is to improve the survivability of early career teachers by focusing on one key area Efficiency or what is referred to as Time Management This book will examine how teachers can become more efficient in their lesson and unit planning classroom organization assessment of their students how they interact with parents and even when they search and interview for a job Special emphasis is placed on one of the most challenging aspects of teaching classroom behavioral management The underlying basis for this book is a deep belief that successfully managing time will allow teachers to create a positive balance between one s professional and personal lives It is all too common to see time stressed and sleep exhausted teachers lose sight of the reasons they entered teaching eventually falling out of love with their subject and those they teach This book will tackle head on the demands that teachers face by posing many detailed practical solutions to time management problems in a variety of different contexts These solutions will not only come from the author s own experience preparing New York City science students for over 25 years but from researchers and veteran teachers and administrators who have published their findings and advice in leading educational journals It is time to stop procrastinating and draw upon your inner grit to create order routines and systems that can be used successfully in your teaching profession
