Secret to Managing Multiple Cases of Separation Anxiety in the Early Childhood Classroom Christine Colonna, 2007 At the start of every school year countless preschool aged children and their parents experience pangs of separation As parents the best way to develop the child s confidence in moving from one experience to another is to separate from the child trusting the child s classroom teacher to take over after they have gone Once the parent and child have separated the classroom teachers must be fully prepared for instances of separation anxiety even if it involves treating multiple cases at once While certain strategies have been researched to successfully assimilate a child into a classroom most

of the time the strategies can only be implemented for one child at a time Teachers cannot be expected to devote their attention to one child and leave the others ignored and overlooked This study aimed to test the most effective way to manage an early childhood classroom with multiple cases of separation anxiety The investigation used a young nursery class containing 15 two year olds a head teacher two assistant teachers and an additional teacher The teachers implemented five possible strategies for managing multiple cases of separation anxiety simultaneously All five strategies proved successful though the investigator was able to determine something even greater The truth is that all children no matter what age are significantly diverse so no one strategy will ever suffice In the eyes of the investigator the strategies are endless and discovering a successful one is possible for any child
