Skateboarding LA Gregory J. Snyder,2017-12-05 Inside the complex and misunderstood world of professional street skateboarding On a sunny Sunday in Los Angeles a crew of skaters and videographers watch as one of them attempts to land a heel flip over a fire hydrant on a sidewalk in front of the Biltmore Hotel A staff member of the hotel demands they leave and picks up his phone to call the police Not only does the skater land the trick but he does so quickly and spares everyone the unwanted stress of having to deal with the cops This is not an uncommon occurrence in skateboarding which is illegal in most American cities and this interaction is just part of the process of being a professional street skater This is just one of Gregory Snyder s experiences from eight years inside the world of professional street skateboarding a highly refined athletic and aesthetic pursuit from which a large number of people profit Skateboarding LA details the history of skateboarding describes basic and complex tricks tours some of LA s most famous spots and provides an enthusiastic appreciation of this dangerous and creative practice Particularly concerned with public spaces Snyder shows that skateboarding offers cities much more than petty vandalism and exaggerated claims of destruction Rather skateboarding draws highly talented young people from around the

globe to skateboarding cities building a diverse and wide reaching community of skateboarders filmmakers photographers writers and entrepreneurs Snyder also argues that as stewards of public plazas and parks skateboarders deter homeless encampments and drug dealers In one stunning case skateboarders transformed the West LA Courthouse with Nike s assistance into a skateable public space Through interviews with current and former professional skateboarders Snyder vividly expresses their passion dedication and creativity Especially in relation to the city s architectural features ledges banks gaps stairs and handrails they are constantly re imagining and repurposing these urban spaces in order to perform their ever increasingly difficult tricks For anyone interested in this dynamic and daunting activity Skateboarding LA is an amazing ride

Rural Transport In Developing Countries I. Barwell, G. A. Edmonds, J. D. G. F. Howe, J. De Veen, 2019-06-21 For more than three decades investment in the transport sector has been a priority for developing country governments With a few exceptions roads have accounted for the major part of these investments The explicit and often articulated assumption upon which the decision to allocate such large sums of money to road transport has been made is that road transport and development are inextricably linked The implicit and rarely articulated assumption is that the provision of suitable roads will lead to the operation of an adequate level of road transport services If roads do not actually produce economic development it has been argued they certainly play a major role This belief in the beneficial effects of roads is not wholly unsubstantiated Clearly the provision of some form of access is vital for the development of the rural economy Nevertheless the studies carried out over the last 10 15 years on the impact of highway investment have sounded a cautionary note George W Wilson writing in the concluding chapter of the Brookings Institution studies on transport and development suggested that A much more sceptical attitude towards transport appears essential and far more attention needs to be devoted to the set of circumstances surrounding expansion of transport capacity 1 The suggestion of a more restrained attitude reflected a growing concern that transport and in particular roads was only one factor amongst a large number that needed to be integrated for effective development The concern to see road transport in a wider context partly explains the move towards the evaluation of the social as well as strictly economic benefits of road construction
