

The dangers are real, but how extensive are they? To date there have been few scientific reports on the relation between cell phone use and traffic accidents. In 1997, Donald Redelmeier and Robert Tibshirani studied 699 drivers who owned mobile phones and had been in accidents. The drivers, who volunteered for the study, gave the researchers detailed billing records of their phone calls. With these data, the researchers found that “the risk of a collision when using a cellular telephone was four times higher than the risk when a cellular telephone was not being used” (433). Although this conclusion sounds dramatic, Redelmeier and Tibshirani caution against reading too much into it:

Our study indicates an association but not necessarily a causal relation between the use of cellular telephones while driving and a subsequent motor vehicle collision. . . . In addition, our study did not include serious injuries. . . . Finally, the data do not indicate that the drivers were at fault in the collisions; it may be that cellular telephones merely decrease a driver’s ability to avoid a collision caused by someone else. (457)

Pointing out that cell phones have benefits as well as risks, the authors do not recommend restrictions on their use while driving.

Unfortunately, most states do not keep adequate records on the number of times phones are a factor in accidents. As of December 2000, only ten states were trying to keep such records (Sundeen 2). In addition, currently there is little scientific evidence comparing the use of cell phones with other driver

**Ninth Edition** Kate L. Turabian, 2018-04-27 When Kate L. Turabian first put her famous guidelines to paper she could hardly have imagined the world in which today's students would be conducting research. Yet the ways in which we research and compose papers may have changed, but the fundamentals remain the same: writers need to have a strong research question, construct an evidence-based argument, cite their sources, and structure their work in a logical way. *A Manual for Writers of Research Papers, Theses, and Dissertations*, also known as Turabian, remains one of the most popular books for writers because of its timeless focus on achieving these goals. This new edition filters decades of expertise into modern standards. While previous editions incorporated digital forms of research and writing, this edition goes even further to build information literacy, recognizing that most students will be doing their work largely or entirely online and on screens. Chapters include updated advice on finding, evaluating, and citing a wide range of digital sources and also recognize the evolving use of software for citation management, graphics, and paper format and submission. The ninth edition is fully aligned with the recently released *Chicago Manual of Style* 17th edition as well as with the latest edition of *The Craft of Research*. Teachers and users of the previous editions will recognize the familiar three-part structure. Part 1 covers every step of the research and writing process, including drafting and revising. Part 2 offers a comprehensive guide to Chicago's two methods of source citation: notes/bibliography and author-date. Part 3 gets into matters of editorial style and the correct way to present quotations and visual material. *A Manual for Writers* also covers an issue familiar to writers of all levels: how to conquer the fear of tackling a major writing project. Through eight decades and millions of copies, *A Manual for Writers* has helped generations shape their ideas into compelling research papers. This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines. Bestselling, trusted, and time-tested advice for writing research papers. The best interpretation of Chicago style for higher education students and researchers. Definitive, clear, and easy to read, with plenty of examples. Shows how to compose a strong research question, construct an evidence-based argument, cite sources, and structure work in a logical way. Essential for anyone interested in learning about research. Everything any student or teacher needs to know concerning paper writing. *The Good Paper*, Lotte Rienecker, Peter Stray, Jørgensen, Signe Skov, 2013. In Danish higher education. *The ABCs of APA Style*, Beth Lee, 2017-08-30. Very few students and even professionals know how to write using American Psychological Association Style. You are not the only one. Beth Lee knows this to be true because she has been teaching APA style for more than a dozen years. She's accustomed to hearing students say things such as "What is APA?" "How do I use it?" "Can't I just use MLA?" The reality is that many professors, instructors, and professions insist on using APA Style. In this guide, you'll learn how to take down information to make citing easier, look up information in style guides, memorize the most important rules, and avoid the most common mistakes. While it would be easy to copy and paste web addresses into essays and academic papers, that is not how APA Style works. If you don't know the rules, your writing won't be taken as seriously, and if you're in school, your marks will suffer. Once you understand the main elements

of APA style you'll be equipped to use more complex style guides and reference materials Bolster your academic writing today with lessons in *The ABCs of APA Style* **Essay Writing: Step-By-Step** Newsweek Education Program, 2003-07-22 For more than 30 years the Newsweek Education Program has been providing teachers and students with the finest integrated news education program in the United States This is an invaluable educational resource from a trusted program dedicated to helping students succeed **Homework Helpers: Essays & Term Papers** Michelle McLean, 2011-01-20 A fun user friendly guide that takes the confusion out of writing essays and papers for students of all ages Unlike other books that are so full of technical jargon that they confuse more than help Homework Helpers Essays and Term Papers uses straightforward language and simple steps to guide students through the essay writing process Homework Helpers Essays and Term Papers Describes in detailed plain English each element and step involved in writing a dozen different types of essays Includes a rough edited and final draft sample of each type of essay discussed Explains the necessity of proofreading and citing sources providing tips and instruction on how to accomplish these tasks Presents step by step instructions on how to write a great SAT essay Discusses what students can expect when they reach college level courses Students of all ages can find help in writing essays for every major subject in high school or college Neophytes will find guidance on the basics while those further along in their educational career can adapt the detailed instructions for more in depth assignments *An EasyGuide to APA Style* Beth M.
