referred to as an electric vehicle or EV In **Select Your Electric Car** I explore the various options of EVs available in the United States If you live in California or in one of the other states which have similar zero emission vehicle standards you will have more choices These states have laws that car companies selling cars in their state must provide a certain percentage of EVs I am going to focus on the EVs which are widely available in the US now 2018 I ll compare them so that hopefully you will be able to purchase the EV which fits your lifestyle or the lifestyle which you plan to adopt once you own an EV I ll also look at a few other EVs which are not as widely available In 2019 car dealers will be offering more models of EVs nationally at least that s the plan I m thinking that you might want a car with more of a track record So I won t be saying as much about those models though I will mention them The US ranks seventh in number of EVs sold following China United Kingdom France Sweden Netherlands and Norway who is at 1 If you wanted to wait until 2019 to drive your EV and you had 200 000 200K to spare and you had a Commercial Driver s License CDL or could hire a driver who did why not just purchase a Tesla Electric Semi After all Elon Musk is now saying it will have a 600 mile range Even if he s only 75% correct that s still a 450 mile
