Dis/organization as Communication Consuelo Vásquez, Timothy Kuhn, 2019-03-13 This book accounts for the transformation of organizations in a post bureaucratic era by bringing a communicational lens to the ontological discussion on organization disorganization offering a conceptual and methodological toolbox for studying dis organization as communication Increasingly scholars acknowledge that communication is constitutive of organization because meaning is always indeterminate communication also and simultaneously generates disorganization The book synthesizes the major theoretical trends and empirical studies in communication that engage with dis organization Drawing on dialectics relational ontologies critical theory systems theory and affect thinking the first part of the book offers communicational explanations of how dis organization unfolds The second part of the book grounds this theoretical reflection providing empirical studies that mobilize diverse methodological and analytical frameworks e.g. ethnography situational interactional and genre analysis for studying the practices of dis organization Overall the book exposes organizations and organizing processes as significantly messier irrational or a rational and paradoxical than scholars of organization typically think It also offers readers the conceptual and methodological tools to understand these complex processes as communication This book will be essential reading for scholars in organizational communication or management and organization studies together with senior undergraduate and graduate students studying organizational communication organizational discourse discourse analysis including rhetoric semiotics pragmatism

narratology and courses in management studies It will also be richly rewarding for organizational consultants managers and executives
