Imperatives Mikhail Kissine:

Imperatives Mark Jary,Mikhail Kissine,2014-07-17 An engaging overview of imperatives and a close examination of how different theoretical traditions have tried to explain them   Wh-exclamatives, Imperatives and Wh-questions Simone Guesser,Ani Marchesan,Paulo Medeiros Junior,2023-12-18 Research on left periphery phenomena has increased in the last 20 years resulting in consistent studies from a wide range of languages and a fruitful debate on the functional projections within the CP system Throughout these years important contributions have been made on Brazilian Portuguese especially on wh interrogative sentences focalization topicalization and relative clauses As for exclamative and imperative sentences however there is a considerable research gap in all grammatical levels Regarding interrogatives semantic and prosodic studies are still lacking as well as research on the acquisition and processing of these constructions This collected volume fills some of those gaps gathering studies on wh exclamatives imperatives and wh questions in Brazilian Portuguese which approach syntactical semantical and prosodic aspects of these constructions through a rich and yet unregistered set of data They also deliver novel acquisition and diachronic data that will further both the comprehension of Brazilian Portuguese grammar and the ongoing discussions on left periphery phenomena   **Revisiting Sentence Adverbials and Relevance** Irina T. Pandarova,2023-06-15 This book offers a fresh take on several long standing issues relating to the non truth conditional interpretation of epistemic evidential hearsay and attitudinal sentence adverbials Drawing on a wealth of data from English and German it shows for the first time that all four adverbial classes can have both truth conditional and non truth conditional parenthetical readings A novel account is presented according to which non truth conditional readings may arise at either the syntactic or the pragmatic level Couched in relevance theory the book also re examines the explicature and illocutionary status of the adverbial qualification and the qualified proposition and refines the notions of pointhood and at issueness to provide an original information structural analysis applicable to not just sentence adverbials but a range of other propositional qualifiers Finally the investigation identifies five factors affecting non truth conditional interpretation linear position prosody the semantics of the adverbial its information structural properties and the wider context The book will be of interest to those interested in relevance theory the semantics pragmatics interface the syntax pragmatics interface and information structure as well as for syntacticians semanticists and pragmatists interested in sentence adverbials other propositional qualifiers and parentheticality syntactic and interpretational   **Imperative Turns at Talk** Marja-Leena Sorjonen,Liisa Raevaara,Elizabeth Couper-Kuhlen,2017-08-15 In middle class Anglo speaking circles imperatives are considered impolite forms that command another to do something etiquette manuals recommend avoiding them The papers in this collection de construct such lay beliefs Through the empirical examination of everyday and institutional interaction across a range of languages they show that imperatives are routinely used for constructing turns that further sociality in interactional situations Moreover they show that for understanding the use of an imperatively formatted turn its specific

design whether it contains e g an overt subject object modal particles or diminutives and its sequential and temporal positioning in verbal and embodied activities are crucial The fact that the same type of imperative turn is appropriate under the same circumstances across linguistically diverse cultures suggests that there are common aspects of imperative turn design and common pragmatic dimensions of situations warranting their use The volume provides new insights into the resources and processes involved when social actors try to get another to do something **Imperatives and Directive Strategies** Daniël Van Olmen,Simone Heinold,2017-04-11 Imperatives and directive strategies have intrigued both formalists and functionalists They continue to search for the answers to questions like what are the semantics of the imperative how is it used in the world s languages and which factors determine the choice between imperatives and other directive strategies This volume takes a broadly functional typological perspective and contributes to the literature in several respects It presents new data from a variety of languages some of which have not been studied in depth before It exemplifies the benefits of traditional methodologies as well as the potential of more innovative ones In addition the volume sheds new light on the imperative as a typological notion its meaning and uses and its interaction with other grammatical categories It also offers new insights into the relation between different directive strategies within and across languages and into the dis similarities between equivalent directive strategies in a language family **Mood, Aspect, Modality Revisited** Joanna Blaszczak,Anastasia Giannakidou,Dorota Klimek-Jankowska,Krzysztof Migdalski,2017-01-12 Over the past several decades linguistic theorizing of tense aspect and mood TAM along with a strongly growing body of crosslinguistic studies has revealed complexity in the data that challenges traditional distinctions and treatments of these categories Mood Aspect Modality Revisited argues that it s time to revisit our conventional assumptions and reconsider our foundational questions What exactly is a linguistic category What kinds of categories do labels such as subjunctive imperative future and modality truly refer to In short how categorical are categories Current literature assumes a straightforward link between grammatical category and semantic function and descriptions of well studied languages have cultivated a sense of predictability in patterns over time As the editors and contributors of Mood Aspect Modality Revisited prove however this predictability and stability vanish in the study of lesser known patterns and languages The ten provocative essays gathered here present fascinating cutting edge research demonstrating that the traditional grammatical distinctions are ultimately fluid and perhaps even illusory Developing groundbreaking and highly original theories the contributors in this volume seek to unravel more general fundamental principles of TAM that can help us better understand the nature of linguistic representations **Relevance, Pragmatics and Interpretation** Kate Scott,Billy Clark,Robyn Carston,2019-07-18 Showcases recent research by leading scholars working within the relevance theoretic pragmatics framework **Verb and Context** Susana Rodríguez Rosique,Jordi M. Antolí Martínez,2023-01-15 This volume approaches the interaction of evidentiality with some other related categories such as modality and mirativity from an innovative angle its connection to informational

configuration The aim of this book is to analyze the impact of shared knowledge on TAME categories as well as to explore its reflection on different verb choices It provides an innovative theoretical view as well as a robust typological crosslinguistic perspective **Travelling Texts – Texts Travelling** Renate Bauer,Christine Elsweiler,Ulrike Krischke,Kerstin Majewski,2023-11-08 This Gedenkschrift celebrates the memory of Professor Hans Sauer and his passion for travelling The contributions in this volume explore different kinds of textual and temporal travels from various linguistic literary and philological perspectives <u>Intensification and Modal Necessity in Mandarin Chinese</u> Jiun-Shiung Wu,2018-11-15 This book addresses intensification and modal necessity in Mandarin Chinese Intensification is used in this book to describe the speaker s emphasis on a proposition because by emphasizing on a proposition the speaker intensifies the degree of his her confidence and affirmativeness toward the truth of a proposition cf the distinction between weaker and stronger Modal necessity discussed in this book refers either to the speaker s certainty regarding the truth of an inference judgment or stipulation that is epistemic necessity or to the speaker s certainty concerning the obligatoriness of a proposition based on rules or regulations i e deontic necessity This book examines a series of lexical items in Mandarin Chinese that express either intensification or modal necessity provides a unified semantics and also presents how these lexical items are semantically distinct Intensification and Modal Necessity in Mandarin Chinese is aimed at instructors researchers and post graduate students of Chinese Linguistics <u>A New Identity of Obligation: Metaphors and Paul's Ethical Argument in Romans 6:1–14</u> Andrés D. Vera,2025-06-19 In Romans 6 1 14 Paul corrects an erroneous ethical conclusion drawn from the narrative of God s grace in Romans 3 5 This innovative study employs tools from cognitive linguistics to unveil Paul s sophisticated rhetorical strategy for resolving the indicative imperative tension By moving beyond traditional theological frameworks the book shows how Paul presents believers new identity as defined by a new obligation illuminating the metaphorical narrative that undergirds Paul s logic Readers will better understand the importance of conceptual spaces like in sin and in Christ and how Paul conceptualizes the relationship between believers and their old selves who have been crucified **Indirect Speech Acts** Nicolas Ruytenbeek,2021-06-10 To achieve successful communication it is crucial to say clearly what we mean but at the same time we need to pay attention to the form of our utterances to avoid misunderstandings and the risk of offending our interlocutors To avoid these pitfalls we use a special category of utterances called indirect speech acts ISAs that enable an optimal balance between clarity and politeness But how do interpreters identify the meaning of these ISAs And how does the social context influence the use of ISAs This book attempts to answer these questions It deals with the main theoretical and empirical questions surrounding the meaning and usage of ISAs drawing on the latest research and neuroimaging data Adopting a truly interdisciplinary perspective it will appeal to students and scholars from diverse backgrounds and anyone interested in exploring this phenomenon which is so pervasive in our daily lives **Clause Typing in the Old Irish Verbal Complex** Carlos García-Castillero,2020-07-06 Austin s words on page 1 of his seminal work How to do things with words are

valid for this study on clause typing in the Old Irish verbal complex The phenomenon to be discussed is very widespread and obvious and it cannot fail to have been already noticed at least here and there by others Yet I have not found attention paid to it specifically Old Irish a regular V1 language morphologically distinguishes six clause types to wit declarative relative wh and polar interrogative responsive and imperative clause types After discussing the constituency of the Old Irish verbal complex and the pragmatically marked orders i e cleft sentence and left dislocation the form function paradigmatic consistency and syntax of those clause types are then analysed in detail The other main issues of this study are the descriptively adequate paradigm of clause types and the interaction of clause typing with subordination and with non verbal predication in Old Irish This monograph offers a comprehensive view of clause typing its morphological expression and related phenomena in the earliest Insular Celtic language and may also contribute to the general consideration of these topics in both the typological and diachronic perspectives **Trends in Hindi Linguistics** Ghanshyam Sharma,Rajesh Bhatt,2018-09-10 Trends in Hindi Linguistics provides a snapshot of current developments in Hindi syntax and semantics and covers topics such as definiteness marking comparative constructions with differentials conjunct verbs participial relative clauses ellipsis scrambling infinitives and directive strategies Together these papers give a rich and in depth account of the vitality of current research on Hindi **Speech Acts and Clause Types** Peter Siemund,2018-02-01 This book is an introduction to the relationship between the morphosyntactic properties of sentences and their associated illocutionary forces or force potentials The volume begins with several chapters dedicated to important theoretical and methodological issues such as sentence and utterance meaning illocutionary force clause types and cross linguistic comparison The bulk of the book is then composed of chapter length case studies that systematically investigate typologically prominent clause types and their forces such as declaratives and assertions interrogatives and questions and imperatives and commands These case studies begin with an overview of the necessary theoretical foundations followed by a discussion of the grammatical structures of English and an assessment of the relevant cross linguistic facts Each chapter ends with a succinct summary of the most important findings practice exercises and recommendations for further reading and research Overall the book works towards developing a gradient model of clause types that goes substantially beyond the traditional distinction between major and minor clause types It draws on insights from linguistics philosophy and sociology and may be used as a textbook for undergraduate or graduate courses in semantics pragmatics and morphosyntax **Commands** Alexandra Y. Aikhenvald,R. M. W. Dixon,2017-07-04 This book focuses on the form and the function of commands directive speech acts such as pleas entreaties and orders from a typological perspective A team of internationally renowned experts in the field examine the interrelationship of these speech acts with cultural stereotypes and practices as well as their origins and development especially in the light of language contact The volume begins with an introduction outlining the marking and the meaning of imperatives and other ways of expressing commands and directives Each of the chapters that follow offers an

in depth analysis of commands in a particular language These analyses are cast in terms of basic linguistic theory a cumulative typological functional framework and the chapters are arranged and structured in a way that allows useful comparison between them The languages investigated include Quechua Japanese Lao Aguaruna and Ashaninka Satipo both from Peru Dyirbal from Australia Zenzontepec Chatino from Mexico Nungon Tayatuk and Karawari from Papua New Guinea Korowai from West Papua Wolaitta from Ethiopia and Northern Paiute a native language of the United States *Aspects of Linguistic Variation* Daniël Olmen,Tanja Mortelmans,Frank Brisard,2018-12-03 Linguistic variation is a topic of ongoing interest to the field Its description and its explanations continue to intrigue scholars from many different backgrounds By taking a deliberately broad perspective on the matter covering not only crosslinguistic and diachronic but also intralinguistic and interspeaker variation and examining phenomena ranging from negation over connectives to definite articles in well and lesser known languages the volume furthers our understanding of variation in general The papers offer new insights into among other things the theoretical notion of comparative concepts the social or mental nature of language structure the areal factor in lexical typology and the diachronic implications of semantic maps The collection will thus be of relevance to typologists and historical linguists as well as to people studying variation within the areas of cognitive and functional linguistics The Oxford Handbook of Lying Jörg Meibauer,2019 This handbook brings together past and current research on all aspects of lying and deception from the combined perspectives of linguistics philosophy and psychology It will be an essential reference for students and researchers in these fields and will contribute to establishing the vibrant new field of interdisciplinary lying research Communication Igor E. Klyukanov,2022-06-10 Focusing on the scientific study of communication this book is a systematic examination To that end the natural social cultural and rational scientific perspectives on communication are presented and then brought together in one unifying framework of the semiotic square showing how all four views are interconnected The question of whether the study of communication can be considered a unique science is addressed It is argued that communication is never separate from any object of study and thus we always deal with its manifestations captured in the four scientific perspectives discussed in the book **Semantics, Pragmatics, Philosophy** Kasia M. Jaszczolt,2023-03-16 Semantics and pragmatics the study of meaning and meaning in context respectively are two fundamental areas of linguistics and as such are crucial to our understanding of how meaning is created However their theoretical ideas are often introduced without making clear connections between views theories and problems This pioneering volume is both a textbook and a research guide taking the reader on a journey through language and ultimately enabling them to think about meaning as linguists and philosophers would Assuming no prior knowledge of linguistics it introduces semantics pragmatics and the philosophy of language showing how all three fields can address the big questions that run through the study of meaning It covers key theories and approaches while also enabling increasingly more sophisticated questions about the interconnected aspects of meaning with the end goal of preparing the reader to make

their own original contributions to ideas about meaning
