China are shifting traditional arm's length methods to a quasi-formulary apportionment system. Providing a comprehensive understanding of all aspects of the formulary apportionment option, this state-of-the-art summary of history, current practice, proposals and prospects in the ongoing debate over arm's length versus formulary apportionment methodologies will be welcomed by practitioners, policy makers and academics concerned with international taxation, all of whom will gain an understanding of the case put forward by proponents for adoption of formulary apportionment in Europe and globally and the counter arguments they face. Readers will acquire a better understanding of the implications of formulary apportionment and its central role in the current debate about the future of international taxation rules, providing all the intellectual ammunition needed to carefully re-examine one of the ideas traditionally considered as apocryphal by the OECD and to a significant portion of the tax professional community. Readers of this book will come away not only with a renewed understanding of the multiple facets of formulary apportionment but also of some of the fundamental pressure points in the international tax system. Accordingly, it is a welcome and timely addition to the literature. Dr Stjepan Gadžo, Assistant Professor at University of Rijeka Faculty of Law, British Tax Review 2021 Issue 2, p243-246.

Martin, Michael Burrow, 2015-05-20. The sixth edition of Financial Management provides students with an overview of financial management suited to the first course in finance. The focus of the text is on the big picture, providing an introduction to financial decision-making grounded in current financial theory and the current state of world economic conditions. Attention is paid to both valuation and capital markets as well as their influence on corporate financial decisions. The 10 basic principles of finance are introduced in the first chapter and woven throughout the text to give students a solid foundation from which to build their knowledge of finance. The goal of this text is to go beyond teaching the tools of a discipline or a trade and help students gain a complete understanding of the subject. This will give them the ability to apply what they have learnt to new and as yet unforeseen problems in order to educate students in finance.
