Empowering

the Voice of the Teacher Researcher Roger Neilson Brindley, Christine M. Crocco, 2010-11-16 Empowering the Voice of the Teacher Researcher through a Culture of Inquiry is essentially a description of one school's initiatives to use collaborative communities and action research to empower teacher research and a culture of collective inquiry. It is written by teachers primarily for teachers and teacher educators. Of course, none of the initiatives described in the text would be possible without the visionary leadership of school and district administrators. Because administrative support is foundational to the process, school and district administrators and staff developers will also be interested in reading about how this school's principal and assistant principal set the stage for developing their community of learners. There are many sound action research texts on the market. This text is apart by its first person accounts of teachers' experiences with action research as examples of profound possibilities for professional growth. As such, this book, written by teachers for other teachers and then contextualized by the Editors so that the relevance is clear to a broader audience, fills an important niche in the literature.

Research Anthology on Adult Education and the Development of Lifelong Learners Management Association, Information Resources, 2021-03-19 Whether it is earning a GED, a particular skill, or technical topic for a career, taking classes of interest, or even returning to begin a degree program or completing it, adult learning encompasses those beyond the traditional university age seeking out education. This type of education could be considered non-traditional as it goes beyond the typical educational path and develops learners that are self-initiated and focused on personal development in the form of gaining some sort of education. Essentially, it is a voluntary choice of learning throughout life for personal and professional development. While there is often a large focus towards K-12 and higher education, it is important that research also focuses on the developing trends, technologies, and techniques for providing adult education along with understanding lifelong learners' choices, developments, and needs. The Research Anthology on Adult Education and the Development of Lifelong Learners focuses specifically on adult education and the best practices, services, and educational environments and methods for both the teaching and learning of adults. This spans further into the understanding of what it means to be a lifelong learner and how to develop adults who want to voluntarily contribute to their own development by enhancing their education level or knowledge of certain topics. This book is essential for teachers and professors, course instructors, business professionals, school administrators, practitioners, researchers, academicians, and students interested in the latest advancements in adult education and lifelong learning.

Serving Educational Equity Sonya Murray-Darden, Gwendolyn Y. Turner, 2023-05-17 Connect theory to practice with this timely comprehensive whole child approach to accelerated learning. Planning for equitable accelerated learning is analogous to preparing a meal. Similar to a chef selecting the menu, gathering ingredients, and planning the occasion, educators choose aligned curricula to prioritize learning, organize and internalize instruction, and plan for opportunities to advance student learning. Grounded in research and employing the Science of Learning Development (SoLD) principles, this book offers bold new thinking about unfinished learning, equity, and

student success The five course framework guides educators through the process of Assessing the current school conditions and mindset for acceleration versus remediation Reflecting on empowerment Surveying and reimagining curriculum Understanding and embracing diversity and equity Establishing and implementing effective foundational instruction Promoting expanding and reflecting on student engagement Including frequent opportunities for reader reflection real world vignettes and tools that can be brought directly into the classroom this book delivers everything educators need to adopt a whole child approach to advancing student learning and engagement *Resources in Education* ,2001 *Embodied Curriculum Theory and Research in Arts Education* Susan W. Weber's EdPsych Modules uses an innovative implementation of case studies and a modular format to address the challenge of effectively connecting theory and research to practice. Each module is a succinct stand-alone topic that represents every subject found in traditional chapter texts and can be used in any order for maximum flexibility in organizing your course. Each of the book's eight units of modules begins with a set of four case studies: early childhood, elementary, middle school, and secondary, and ends with Assess and Reflect and Evaluate questions and activities to encourage comprehension and application of the research and theories presented. The case approach and the extensive pedagogy that support it allows students to constantly see the applications of the theories and research that they are studying in the text.
