The Software Encyclopedia 2001 ,2001 The Waterside Ape Peter H. Rhys Evans,2019-07-24 Why are humans so fond of water Why is our skin colour so variable Why aren t we hairy like our close ape relatives A savannah scenario of human evolution has been widely accepted primarily due to fossil evidence and fossils do not offer insight into these questions Other alternative evolutionary scenarios might but these models have been rejected This book explores a controversial idea that human evolution was intimately associated with watery habitats as much or more than typical savannahs Written from a medical point of view the author presents evidence supporting a credible alternative explanation for how humans diverged from our primate ancestors Anatomical and physiological evidence offer insight into hairlessness different coloured skin subcutaneous fat large brains a marine type kidney a unique heat regulation system and speech This evidence suggests that humans may well have evolved not just as savannah mammals as is generally believed but with more affinity for aquatic habitats rivers streams lakes and coasts Key Features Presents the

evidence for a close association between riparian habitats and the origin of humans Reviews the savannah ape hypothesis for human origins Describes various anatomical adaptations that are associated with hypotheses of human evolution Explores characteristics from the head and neck such as skull and sinus structures the larynx and ear structures and functions Corroborates a novel scenario for the origin of human kind a counterpoint to the textbooks or other books which deal with human evolution I think readers will see it as a clearly written well supported discussion of an alternative perspective on human origins Kathlyn Stewart Canadian Museum of Nature Ottawa There is a pressing need to expand discussions of human evolution to include non anthropocentric narratives that use comparative data Dr Rhys Evans specific expertise and experience with the human head neck ears throat mouth and sinuses provides him with a distinct perspective from which to approach the subject of human evolution Moreover his understanding of non anthropocentric views of human evolution water based models allow him to apply a biological approach to the subject missing in more traditional savannah based models Stephen Munro National Museum of Australia
