The **amygdala** sends more neural projections up to the cortex than it receives back.

Lazarus conceded that some emotional responses do not require **conscious** thinking.

Table 96.1 Summary of Emotion Theories

Theory	Explanation of Emotions	Example
James-Lange	Emotions arise from our awareness of our bodily responses to emotion-arousing stimuli: stimulus- arousal- emotion	We observe our heart racing after a threat and then we feel afraid
Cannon-Bard	Emotion-arousing stimuli trigger our bodily responses and simultaneous subjective experience	Our heart races at the same time that we feel afraid
Schachter-Singer	Our experience of emotion depends on two factors: general arousal and a conscious cognitive label	We may interpret our arousal as fear or excitement, depending on the context
Zajonc; LeDoux	Some embodied responses happen instantly, without conscious appraisal	We automatically feel startled by a sound in the forest before labeling it as a threat
Lazarus	Cognitive appraisal (is it dangerous or not?)- sometimes without our awareness- defines emotion	The sound is "just the wind"

What is activated when we experience negative social emotions such as lust, pride, and disgust?

Insula

Positive moods tend to trigger more activity where?

Emotional Memory Failures Ineke Wessel, Daniel B. Wright, 2004 The beginning of the 1990 s saw a partisan debate about the nature of recovered memories for highly emotional events Some authors claimed that recovered memories of trauma always referred to veridical memories that had been inaccessible for years Others argued that such memories were false by definition and that they were created by therapeutic attempts to uncover trauma that was believed to lie at the root of anxiety or depression Although the debate soon moved to a middle ground both sides fuelled the development of relevant experimental paradigms to explore the mechanisms for how false memories might be created and also how true memories might be forgotten Examples are studies looking at memory implanting false word memory and retrieval induced forgetting in the mid 1990 s Many studies using such paradigms however relied on emotionally neutral material Studies relating to trauma were less readily available Now more and more researchers are bridging this gap testing whether emotive material can be implanted and forgotten and whether there are special populations more susceptible to these effects This special issue brings together papers examining emotion and memory malleability both providing a picture of the state of the art research and pushing the field forward

Emotional Expression and Health Ivan Nyklíček, Lydia Temoshok, 2004-03 this book is timely given the growing scientific interest in the issue of the role of emotional expression in health and disease contributors are authoritative leaders of their field eg James Pennebaker Dept of Psychology University of

Fleenor, 2023-03-22 Benchmarks a 360 degree assessment has been used by approximately 21 000 organizations and over 265 500 managers Data collected through its administration have resulted in large comprehensive databases that have provided the basis for numerous studies These annotations on published research were written for anyone who is interested in the research leading to the development and refinement of Benchmarks the interpretation of the assessment's results or the relationship of Benchmarks to other psychological assessments

Kauffman, Meryem Yilmaz Soylu, 2022-05-24 *Jewish Men and the Holocaust: Sexuality, Emotions, Masculinity* Florian Zabransky, 2024-10-21 During the Holocaust amid death and violence Jewish men were not mere

powerless victims Linking gender studies with a history of sexuality and emotions will highlight intimate agency power struggles negotiations of relationships social dynamics and representations of masculinities Considering the agency and vulnerability will further convey intimate choices the representation of masculine ideals intimate violence and the expression of various emotions such as honour and love As research on the Holocaust often links women with sexuality or portrays women as gendered beings it is crucial to excavate the intimate hidden lives of Jewish men and their specific intimate experiences as men The analysis not only demonstrates how Jewish men remember and make sense of their experiences but also how they chose to form the narrative and how they represented their ordeal in four chapters namely ghettos concentration camps Jewish resistance in the countryside and finally DP camps in the aftermath of the Holocaust The consideration of these four spaces allows a nuanced innovative understanding of the intimate history of Jewish men during the Holocaust i e how some men established male dominated structures and established intimate strategies to find solace and pleasure
