

## **Formal vs Informal Groups: Distinguishing With Examples - Essay Sample Essay**

### **Introduction**

Groups involve a collection of people who have regular interaction, communication, and mutual commitment towards a standard set of goals. The administration establishes formal groups to accomplish the organizational objectives. Informal groups are formed by individuals who have the purpose of satisfying their needs (Chapter 9, Organization Behavior). For groups to thrive, there should be cohesion. This paper focuses on discussing the distinction between the formal and informal groups with examples and the impact of cohesion on groups.

### **Difference Between the Formal and Informal Groups**

A formal group is formed by the management to achieve the set goals, whereas an informal group is formed by people who have the objective of fulfilling their personal needs. Previously, I worked for an organization where the managers assembled us as a group of ten individuals to work towards enhancing the production. However, in class, we have formed a group of three students to discuss the areas we have difficulties to improve our class performance. Additionally, a formal group is significant, whereas the informal groups have fewer members (Chapter 9, Organization Behavior). When working in the organization, we were a group of ten people, but in the class group, we are a group of three students.

Moreover, the formal group is structured in a hierarchical way where there is a leader. However, the informal group has no designated structure (Chapter 9, Organization Behavior). In the organizational group, there was a leader for every team, and members were grouped according to their rank. In the classroom group, there is no criterion for selecting the group members, and everyone has the right to lead the group discussion.

### **Impact of Cohesion on Groups**

Cohesion involves close interpersonal relationships, which lead to active participation among members. The members consider the groups as a family, which makes them assist one another in times of need, which strengthens their bond. Moreover, it leads to improved conformity in the group (Chapter 9, Organization Behavior). Despite the members having different features and norms, they always make sacrifices to conform to the group norms. In my former group, we all had differences, but we had to drop our desires to ensure conformity.

Furthermore, cohesion leads to success as it makes the goal achievement easy. Cohesiveness ensures regular communication and participation of members through coordinated efforts. Communication also leads to minimized conflicts and practical problem solving, which fosters positive interactions in the group. In my previous groups, there were no conflicts as we always communicated our problems.
