Achieving Nelson Mandela University? Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa s higher education sector is rooted in the country s divided past A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges Nelson Mandela University is one of the public universities that emerged from the restructuring process The university is in an ongoing state of evolution of becoming It developed out of the amalgamation of the University of Port Elizabeth Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005 In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake Endeavouring to be something greater and different from the norm imbues its strategy public statements and practices The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become something else In Achieving Nelson Mandela University the university attempts to give an account of itself The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go ICEL 2017 - Proceedings of the 12th

Youth Language Practices and Urban Language Contact in Africa Rajend Mesthrie, Ellen Hurst-Harosh, Heather Brookes, 2021-09-09. An up to date theoretically informed study of male in group street aligned youth language practice in various urban centres in Africa.

Anchored in Place Bank, Leslie, Cloete, Nico, 2018-11-05. Tensions in South African universities have traditionally centred around equity, particularly access and affordability, historical legacies such as apartheid and colonialism, and the shape and structure of the higher education system. What has not received sufficient attention is the contribution of the university to place based development. This volume is the first in South Africa to engage seriously with the place based developmental role of universities. In the international literature and policy, there has been an increasing integration of the university with place based development, especially in cities. This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities. It acknowledges that universities were given specific development roles in regions, homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning. Given the developmental crisis in the country, universities could be expected to play a more constructive and meaningful role in the development of their own precincts, cities and regions. But what should that role be? Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework? What plans and programmes are in place and what is needed to expand the development agency of universities at the local level? Who and what might be involved? Where should the focus lie and who might benefit most and why? Is there a need perhaps to approach the challenges of college towns, secondary cities and metropolitan centers differently? This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria, Nelson Mandela University and especially Fort Hare as one of its post
