Hydramatic is the registered tradename of a family of automatic transmissions developed and produced by General Motors. These transmissions mate a three element torque converter to a Simpson planetary geartrain providing three forward speeds plus reverse. The Turbo Hydramatic THM series was developed to replace both the original Hydra Matic models and the Buick Dynaflo. In its original incarnation as the Turbo Hydramatic 400 it was first used in the 1964 model year in Cadillacs. The Buick version which followed shortly thereafter was known as the Super Turbine 400. By 1973 THM units had replaced all of GM's other automatic transmissions including Chevrolet's Powerglide, Buick's Super Turbine 300 and Oldsmobile's Jetaway. Starting in the early 1980s the Turbo Hydramatic was gradually supplanted by four speed automatics, some of which continue to use the Hydramatic trade name. Although the Turbo Hydramatic name alludes to the Hydramatic developed by General Motors Cadillac division in the late 1930s, the two transmissions were not mechanically related.
