

Small business owners are often faced with the challenge of finding the right balance between providing excellent customer service and maintaining profitability. One way to achieve this balance is by implementing a system of incentives for employees who go above and beyond for their customers. This can be done in a variety of ways, such as offering bonuses, gift cards, or even a percentage of sales. By rewarding employees for their exceptional service, businesses can encourage them to continue to provide the same level of excellence, leading to increased customer loyalty and higher profits.

Grade 1scope Geography 2014:

Developing Core Literacy Proficiencies, Grade 6 Odell Education, 2016-07-21 The Developing Core Literacy Proficiencies program is an integrated set of English Language Arts Literacy units spanning grades 6-12 that provide student-centered instruction on a set of literacy proficiencies at the heart of the Common Core State Standards (CCSS). Reading Closely for Textual Details Making Evidence-Based Claims Making Evidence-Based Claims about Literary Technique Grades 9-12 Researching to Deepen Understanding Building Evidence-Based Arguments The program approaches literacy through the development of knowledge, literacy skills, and academic habits. Throughout the activities, students develop their literacy along these three paths in an integrated, engaging, and empowering way. Knowledge The texts and topics students encounter in the program have been carefully selected to expose them to rich and varied ideas and perspectives of cultural significance. These texts not only equip students with key ideas for participating knowledgeably in the important discussions of our time but also contain the complexity of expression necessary for developing college- and career-ready literacy skills. Literacy Skills The program articulates and targets instruction and assessment on twenty CCSS-aligned literacy skills ranging from making inferences to reflecting critically. Students focus on this set of twenty skills throughout the year, and the program continually applies them in new and more sophisticated ways. Academic Habits The program articulates twelve academic habits for students to develop, apply, and extend as they progress through the sequence of instruction. Instructional notes allow teachers to introduce and discuss academic habits such as preparing and completing tasks that are essential to students' success in the classroom. The program materials include a comprehensive set of instructional sequences, teacher notes, handouts, assessments, rubrics, and graphic organizers designed to support students with a diversity of educational experiences and needs. The integrated assessment system centered around the literacy skills and academic habits allows for the coherent evaluation of student literacy development over the course of the year and vertically across all grade levels.

Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years, there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders, including students, teachers, parents, and policymakers. To be effective, assessment needs to be valid, reliable, and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators, it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit-for-purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in

secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

ENDORSEMENTS Everybody needs to eat Unfortunately too many communities live food insecure and to not address this in our education system is a massive problem Valeri in the book *Educating about for Food Security through Environmental Education* offers brilliant insight through the study of integrating food security into teacher education In doing so Valeri shares the importance of language and specifically root metaphors in addressing food security as a deep cultural problem rather than one of natural occurrence and this book highlights generative ways to not only address food security in teacher education but also to prepare teachers that feel empowered to make very real material changes in their classrooms and communities John Lupinacci Washington State University In light of climate change and the impacts it will inevitably have on food production distribution *Educating about for food security through EE* is an important study examining the intersections of teacher education food security and sustainability Examining ways in which educators and researchers ought to integrate food security into classrooms while also examining the cultural causes of systemic inequity this book is important for teacher educators who are interested in further incorporating food security and suitability into their classrooms Brandon Edwards Schuth Oulu Finland

Dislocating the Orient Daniel Foliard, 2017-04-13 While the twentieth century's conflicting visions and exploitation of the Middle East are well documented the origins of the concept of the Middle East itself have been largely ignored With *Dislocating the Orient* Daniel Foliard tells the story of how the land was brought into being exploring how maps knowledge and blind ignorance all participated in the construction of this imagined region Foliard vividly illustrates how the British first defined the Middle

East as a geopolitical and cartographic region in the nineteenth and early twentieth centuries through their imperial maps. Until then the region had never been clearly distinguished from the East or the Orient. In the course of their colonial activities, however, the British began to conceive of the Middle East as a separate and distinct part of the world with consequences that continue to be felt today. As they reimagined boundaries, the British produced disputed and finally dramatically transformed the geography of the area both culturally and physically over the course of their colonial era. Using a wide variety of primary texts and historical maps to show how the idea of the Middle East came into being, *Dislocating the Orient* will interest historians of the Middle East, the British empire, cultural geography, and cartography.
