their lowest point She argues that federal programs such as George W Bush s No Child Left Behind and Barack Obama s Race to the Top set unreasonable targets for American students punish schools and result in teachers being fired if their students underperform unfairly branding those educators as failures She warns that major foundations individual billionaires and Wall Street hedge fund managers are encouraging the privatization of public education some for idealistic reasons others for profit Many who work with equity funds are eyeing public education as an emerging market for investors Reign of Error begins where The Death and Life of the Great American School System left off providing a deeper argument against privatization and for public education and in a chapter by chapter breakdown putting forth a plan for what can be done to preserve and improve it She makes clear what is right about U S education how policy makers are failing to address the root causes of educational failure and how we can fix it For Ravitch public school education is about knowledge about learning about developing character and about creating citizens for our society It s about helping to inspire independent thinkers not just honing job skills or preparing people for college Public school education is essential to our democracy and its aim since the founding of this country has been to educate citizens who will help carry democracy into the future
