Adam R. Hodge,2019-04-01 In Ecology and Ethnogenesis Adam R Hodge argues that the Eastern Shoshone tribe now located on the Wind River Reservation in Wyoming underwent a process of ethnogenesis through cultural attachment to its physical environment that proved integral to its survival and existence He explores the intersection of environmental indigenous and gender history to illuminate the historic roots of the Eastern Shoshone bands that inhabited the intermountain West during the nineteenth century Hodge presents an impressive longue dur e narrative of Eastern Shoshone history from roughly 1000 CE to 1868 analyzing the major developments that influenced Shoshone culture and identity Geographically spanning the Great Basin Rocky Mountain Columbia Plateau and Great Plains regions Ecology and Ethnogenesis engages environmental history to explore the synergistic relationship between the subsistence methods of indigenous people and the lands that they inhabited prior to the reservation era In examining that history Hodge treats Shoshones other Native peoples and Euroamericans as agents who through their use of the environment were major components of much broader ecosystems The story of the Eastern Shoshones over eight hundred years is an epic story of ecological transformation human agency and cultural adaptation Ecology and Ethnogenesis is a major contribution to environmental history ethnohistory and Native American history It explores Eastern Shoshone ethnogenesis based on interdisciplinary research in history archaeology anthropology and the natural sciences in devoting more attention to the dynamic and often traumatic history of precontact Native America and to how the deeper past profoundly influenced the postcontact era *The Quarterly of the Oregon Historical Society* Oregon Historical Society,1923 *Nellie's Playmates ...
