Managing Scientific Information and Research Data Svetla Baykoucheva, 2015-07-14 Innovative technologies are changing the way research is performed preserved and communicated Managing Scientific Information and Research Data explores how these technologies are used and provides detailed analysis of the approaches and tools developed to manage scientific information and data Following an introduction the book is then divided into 15 chapters discussing the changes in scientific communication new models of publishing and peer review ethics in scientific communication preservation of data discovery tools discipline specific practices of researchers for gathering and using scientific information academic social networks bibliographic management tools information literacy and the information needs of students and researchers the involvement of academic libraries in eScience and the new opportunities it presents to librarians and interviews with experts in scientific information and publishing Promotes innovative technologies for creating sharing and managing scientific content Presents new models of scientific publishing peer review and dissemination of information Serves as a practical guide for researchers students and librarians on how to discover filter and manage scientific information Advocates for the adoption of unique author identifiers such as ORCID and ResearcherID Looks into new tools that make scientific information easy to discover and manage Shows what eScience is and why it is becoming a priority for academic libraries Demonstrates how Electronic Laboratory Notebooks can be used to record store share and manage research data Shows how social media and the new area of Altmetrics increase researchers visibility and measure attention to their research Directs to sources for datasets Provides directions on choosing and using bibliographic management tools Critically examines the metrics used to evaluate research impact Aids strategic thinking and informs decision making *Analysis and Visualization of Citation Networks* Dangzhi Zhao, Andreas Strotmann, 2022-06-01 Citation analysis the exploration of reference patterns in the scholarly and scientific literature has long been applied in a number of social sciences to study research impact knowledge flows and knowledge networks It has important information science applications as well particularly in knowledge representation and in information retrieval Recent years have seen a burgeoning interest in citation analysis to help address research management or information service issues such as university rankings research evaluation or knowledge domain visualization This renewed and growing interest stems from significant improvements in the availability and accessibility of digital bibliographic data both citation and full text and of relevant computer technologies The former provides large amounts of data and the latter the necessary tools for researchers to conduct new types of large scale citation analysis even without special access to special data collections Exciting new developments are emerging this way in many aspects of citation analysis This book critically examines both theory and practical techniques of citation network analysis and visualization one of the two main types of citation analysis the other being evaluative citation analysis To set the context for its main theme the book begins with a discussion of the foundations of citation analysis in general including an overview of

what can and what cannot be done with citation analysis Chapter 1 An in depth examination of the generally accepted steps and procedures for citation network analysis follows including the concepts and techniques that are associated with each step Chapter 2 Individual issues that are particularly important in citation network analysis are then scrutinized namely field delineation and data sources for citation analysis Chapter 3 disambiguation of names and references Chapter 4 and visualization of citation networks Chapter 5 Sufficient technical detail is provided in each chapter so the book can serve as a practical how to guide to conducting citation network analysis and visualization studies While the discussion of most of the topics in this book applies to all types of citation analysis the structure of the text and the details of procedures examples and tools covered here are geared to citation network analysis rather than evaluative citation analysis This conscious choice was based on the authors observation that compared to evaluative citation analysis citation network analysis has not been covered nearly as well by dedicated books despite the fact that it has not been subject to nearly as much severe criticism and has been substantially enriched in recent years with new theory and techniques from research areas such as network science social network analysis or information visualization Table of Contents Acknowledgment Dedications Foundations of Citation Analysis Conducting Citation Network Analysis Steps Concepts Techniques and Tools Field Delineation and Data Sources for Citation Analysis Disambiguation in Citation Network Analysis Visualization of Citation Networks Appendix 3 3 Appendix 5 4 2 Bibliography Author Biographies [How to Get a Paper Published in Academic Journals](#) Ganesh Jaganathan,2024-01-03 This book provides complete coverage of the logical thinking the performance of experiments and the data analysis that is involved in the writing of a paper as well as the actual writing of it More specifically it includes details about improving writing and a step by step guide illustrating the process of thinking writing and polishing the paper regardless of major Simple examples are given to help understand the complexity of writing and pinpoint what aspects journals look for in papers The last few chapters include common mistakes and frequently occurring problems in data analysis and writing and how to rectify them For students from undergraduate to PhD levels and those new to publishing a paper in international journals or struggling to write one the contents of this book are invaluable It is also beneficial to those aiming to write and publish in English if it is not their first language **Citation Management Tools** Nancy R. Glassman,2018-11-23 With the rise of scholarly communication proper citation and attribution practices have become more important than ever Citation management software is an essential tool for meeting this challenge Look no further than the proliferation of free and fee based packages on the market new programs and updated versions of existing software offering innovative features seem to pop up all the time Busy students and researchers do not have the time or energy to test drive all the available options in order to make an informed decision regarding the selection of the right tool to manage their references After finding the right tool they need someone to help them use it properly Librarians must be able to help their patrons navigate the many alternatives and effectively use the special features of the software they ultimately select Citation Management Tools A

Practical Guide for Librarians was written to help librarians teachers and writers demystify the complex world of citation management software Topics include An overview of citation management software including what it can and cannot do Advice on selecting the right program for the right researcher and the right project A comparison of citation managers on the market Leveraging citation managers to provide library services Citation management as a collaboration and networking tool Ways to use citation managers to facilitate proper citation practices and avoiding plagiarism Citation managers to tame the unruly folders on your desktop Mobile citation management Future trends This book focuses on the four citation managers commonly used in libraries EndNote Mendeley RefWorks and Zotero but other noteworthy tools are also described Citation Management Tools A Practical Guide for Librarians provides librarians with the essential skills and information required to support the use of citation managers at their libraries and explore creative ways to use these tools
