Learning and Teaching Chinese as a First Language Sin Manw Sophia Lam, John Chi-Kin Lee, Chung Mou Si, 2024-06-28
In this book the authors embark on a critical investigation of the complex field of Chinese language education with a particular focus on exploring new trends and teaching and learning. They delve into the intricacies of language education and its effectiveness in teaching Chinese as a first language. The book has three objectives: establishing a field of study in Chinese language learning and teaching; providing critical discussion and progressive insights on language education; and offering relevant pedagogical perspectives of learning and teaching Chinese as L1 and L2. The chapters investigate learning and teaching of Chinese in different aspects, including four skills, culture, literature, technology, assisted learning, and learners' identity. By focusing on the teaching practices of Chinese at different levels, it sheds light on teaching Chinese as a first language. Theoretically, it broadens the linguistic and geographical reach of previous works on language education that mainly examine English as a lingua franca or children's first language acquisition. Drawing upon theories in language learning, the book demonstrates the applicability of language theories in the first language and Chinese as a non-alphabetic language and examines the impact and effectiveness of some theories in Chinese learning and teaching. Academic researchers, teacher educators, teachers, and students interested in Chinese language and education will find this a highly relevant text for its focus on curriculum, pedagogy, and assessment of teaching Chinese as a first language.

Changing the Grade Jonathan Cornue, 2018-01-18 Many educators agree that the 100-point grading model is not always a reliable way to evaluate student learning. But is there another way to more accurately and equitably grade students and provide high-quality information to parents while fostering student learning? If so, why haven't school districts across the country changed their practices? In *Changing the Grade*, author and educator Jonathan Cornue presents a detailed model for developing a more reliable standards-based grading system, including 30 steps to guide you through the process. In addition to identifying and addressing the barriers to change, such as concerns about how colleges and employers will interpret an alternative grading model, Cornue offers a concrete structure for changing the grading system, providing guidance on thinking in a new way about why grades are given and the purpose of a report card grade. Identifying what needs to be changed and what actions must be taken to facilitate the change. Building a team of stakeholders, including teachers, principals, and guidance counselors, to lead the change process. Developing the new standards-based grading structure. Designing standards-based assignments and assessments that align with a new grading structure. Avoiding grade inflation and getting buy-in from teachers and other staff members, principals, administrators, the board of education, and the community by demonstrating that the change process is intentional, research-based, student-focused, and permanent. The book also includes helpful samples of standards-based
