Haney, 1966      *National Efficiency Quarterly* , 1918      *Psychiatry and Neuroscience Update - Vol. V* Pascual Ángel Gargiulo, Humberto Luis Mesones-Arroyo, 2024-12-28 This book offers a multidisciplinary approach to the phenomenon of addiction including a discussion of its anthropological neurological psychiatric and social aspects The editors have maintained this multidisciplinary criterion since the first volume of the Psychiatry and Neuroscience Update collection Approaching a topic from multiple points of view guides the mentality to open to biological and psychological relationships and facilitates translational extrapolations The ability to establish relationships closer or more distant but always binding is thus stimulated whether for study research or the interpretation of clinical reality As in previous volumes the book opens with a part dedicated to anthropological and philosophical aspects thus ensuring the validity of the humanistic aspect Intersubjectivity epistemological reflections the meaning of ecstasy and philosophical reflection leading to therapy are explored Part 2 From Basic Neurosciences to Human Brain presents a set of basic investigations with high translational content This corresponds with the editors intention to build bridges here between the basic and the clinical favoring the translational Chapters present topics of interest to both fields such as the neurobiology of addictions cocaine and benzodiazepines Part 3 establishes links between neurosciences learning teaching and the social environment It begins with a chapter on executive functioning before discussing excessive use of computer technology and educational interventions for patients with alcohol addiction The fourth part of the book attempts to explain pathological human behavior It is about establishing links between brain disorders and diseases in the strict sense Among other topics chapters deal with cognitive dysfunction in addiction neuroimaging and stigma around substance use disorders Psychiatry and Neuroscience Update Addiction From Laboratory and Anthropology to Clinical Practice Vol V was edited and authored by a multidisciplinary group of authors and will be vital for an equally multidisciplinary group of readers psychiatrists psychologists neuroscientists and any other clinician or researcher that is interested in addictions Those in the humanities particularly anthropologists and philosophers will find the first part of great interest      **The Literary World** , 1888

*Colorado School Journal* , 1895      *"Genial" Perception* William C. Edinger, 2022-05-15 Genial Perception offers a critical examination of Wordsworth's and Coleridge's naturalist construction of creative and critical perception and a historical study of the perceptual dimension of poetic taste Genial is the adjectival form of genius and eighteenth century critical naturalism understands genial perception as a gift of nature as an inborn power operating autonomously through the senses and imagination and thus independently of cultural influence By exploring the philology of keywords and binaries inherited by the two poet critics and used to describe and interpret their perceptual experience both creative imaginative and critical Genial Perception traces how that experience reveals an unacknowledged indebtedness to discourse and language having been

silently and perhaps unconsciously shaped by patterns and trends in the literary culture in which Wordsworth and Coleridge came of age This study shows that critical perception often thought to be too elusive and subjective to make a proper subject for historical investigation can be approached through study of the terms the language of the practical criticism that attempts to communicate it that both critical and creative perception are far more dependent on language than is commonly recognized and that philology by recovering the original usage functions and contexts of critical keywords provides for an accurate historical understanding of the claims made by critics in the long eighteenth century for genial perception and can illuminate the dynamics of genial perception itself
