This book offers a critical and accessible engagement with research on children's interests that challenges us to move beyond surface level understandings Children's Interests Inquiries and Identities argues that the powerful relationship between interests and informal learning has been under recognised and undervalued The book proposes new principles for understanding children's learning It provides evidence that we need to look beyond the activities or topics children may currently be selecting to find out who and what has stimulated their interests how we might identify and interpret interests more analytically and deeply and how we might respond and engage with these in ways that take children's interests seriously Moving beyond play based activities Helen Hedges explains and illustrates a number of ways by which children s interests can be interpreted and understood to get to the heart of what really matters to and for children The book draws on examples from research with children aged under 5 years and young adults aged 18 25 It also includes a chapter on teachers interests It presents new and original models for interests based curriculum and sociocultural curriculum and pedagogy for future examination in research and practice This book demonstrates that leaving behind long standing taken for granted practices that have influenced understandings of curriculum pedagogy learning and outcomes allows a new perspective of children's interests to emerge It will be of interest to researchers postgraduate students and practitioners in the early years parents and other professionals who work with young children What Does it Mean to be Two?
