Is Reform on Immigration somewhere in the near Future? Research Paper What is the first thing that comes to mind when one might think of Immigration? Possibly what is the United States current Immigration Policy? Would you even think that it is considered to be one of the most debatable topics constantly? There are two sides to every debate; I have been assigned to the pro side for immigration stating that I feel that there should be limits placed on immigration to our country and also more regulation of illegal aliens.

The controversy over immigration first started when migration reached a peak in the early 1900's when between the years of 1900 and 1910 over 1 million immigrants entered the United States each year. (Hsu, 2009) Ever since then, immigration has constantly been in debate. Immigration is the powerful strength behind U. S. population increase, right now accounting for half of total net population boost.

Our countries population growth, which at three million per year right now is the maximum in the developed world, is a main cause of many of the United States problems and presents a severe risk to our limited natural resources such as topsoil, forests, clean air and water, and healthy ecosystems. Statistics are saying that the population of the United States in the year 2050 should be around 500 million. The population is not just growing, but it is rapidly increasing. Some states are becoming so overpopulated with this rapid growth that people are comparing them to be growing more immensely than that of some third world countries. This extremely rapid growth is beginning to put a vast strain on our countries natural resources, cities and environmental health. There is beginning to be many conflicts connected with massive population growth, such as heavy traffic, air pollution, water and energy shortages, extremely overcrowded schools, declines in purchasing authority and quality of living, tax increases, and soil erosion. "However, the average American citizen's birthrate is at substitution level.

What most of the American population doesn't realize is that "over 70% of the United States expansion is due to mass- immigration of people generated into the population growth. " (immigration) A supreme restraint on legal immigration would considerably decrease on both existing and future chain migration. This restriction would give the United States time to even out the current population, address the problems created by over-stressed city infrastructures and poverty, and to form an environmental policy to protect strained natural resources.

A halt would then give time for new immigrants and poor citizens alike to achieve better opportunities through higher salary and improved learning opportunities. "The United states currently takes in over one million legal immigrants each year, which is more than all other developed nations in the world, combined. " The absolute number of immigrants has bas

Scalable and Efficient Probabilistic Topic Model Inference for Textual Data Måns Magnusson, 2018-04-27 Probabilistic topic models have proven to be an extremely versatile class of mixed membership models for discovering the thematic structure of text collections There are many possible applications covering a broad range of areas of study technology natural science social science and the humanities In this thesis a new efficient parallel Markov Chain Monte Carlo inference algorithm is proposed for Bayesian inference in large topic models The proposed methods scale well with the corpus size and can be used for other probabilistic topic models and other natural language processing

applications The proposed methods are fast efficient scalable and will converge to the true posterior distribution In addition in this thesis a supervised topic model for high dimensional text classification is also proposed with emphasis on interpretable document prediction using the horseshoe shrinkage prior in supervised topic models Finally we develop a model and inference algorithm that can model agenda and framing of political speeches over time with a priori defined topics We apply the approach to analyze the evolution of immigration discourse in the Swedish parliament by combining theory from political science and communication science with a probabilistic topic model Probabilistiska mnesmodeller topic models r en m ngsidig klass av modeller f r att estimeras mnessammans ttningar i st rre corpusar Applikationer finns i ett flertal vetenskapsomr den som teknik naturvetenskap samh llsvetenskap och humaniora I denna avhandling f resl s nya effektiva och parallella Markov Chain Monte Carlo algoritmer f r Bayesianiska mnesmodeller De f reslagna metoderna skalar v l med storleken p corpuset och kan anv ndas f r flera olika mnesmodeller och liknande modeller inom spr kteknologi De f reslagna metoderna r snabba effektiva skalbara och konvergerar till den sanna posteriorf rdelningen Dessutom f resl s en mnesmodell f r h gdimensionell textklassificering med tonvikt p tolkningsbar dokumentklassificering genom att anv nda en kraftigt regulariserande priorf rdelningar Slutligen utvecklas en mnesmodell f r att analysera agenda och framing f r ett f rutbest mt mne Med denna metod analyserar vi invandringsdiskursen i Sveriges Riksdag ver tid genom att kombinera teori fr n statsvetenskap kommunikationsvetenskap och probabilistiska mnesmodeller

Dissident

Philosophers T. Allan Hillman, Tully Borland, 2021-11-19 The book consists of sixteen essays and an introduction from prominent philosophers who are at odds with the predominant political trends of academic philosophy political trends primarily associated with leftism Some of these philosophers identify explicitly with the political right an admittedly broad term which ranges from American conservative to British Tory from religious right to non religious right from libertarian to authoritarian Yet other dissident philosophers eschew the left right dichotomy altogether while maintaining a firm political distance from the majority of their left leaning colleagues The primary goal of the volume is to represent a broad constituency of political philosophies and perspectives at variance with the prevailing political sentiments of the academy Each essay is partly autobiographical in nature detailing personal experiences that have influenced these philosophers throughout their lives and partly philosophical putting forth reflections on the intellectual viability of a right leaning or decidedly non left leaning political philosophy or some segment of it The contemporary university is supposed to be the locus of viewpoint diversity and yet as is evident to professors students and virtually anyone else who sets foot within its halls it most certainly is not particularly in matters political Nevertheless these essays are not instances of special pleading or grievance incitement Instead each article provides a glimpse into the life of an academic philosopher whose views have largely been at odds with peers and colleagues Furthermore all of the essays were consciously constructed with the aim of being philosophically rigorous while eschewing technical language and verbose prose In short the essays will be enjoyable to a wide audience
