*Integrated Models of Cognitive Systems* Wayne D. Gray, 2007-04-19 The field of cognitive modeling has progressed beyond modeling cognition in the context of simple laboratory tasks and begun to attack the problem of modeling it in more complex realistic environments such as those studied by researchers in the field of human factors The problems that the cognitive modeling community is tackling focus on modeling certain problems of communication and control that arise when integrating with the external environment factors such as implicit and explicit knowledge emotion cognition and the cognitive system These problems must be solved in order to produce integrated cognitive models of moderately complex tasks Architectures of cognition in these tasks focus on the control of a central system which includes control of the central processor itself initiation of functional processes such as visual search and memory retrieval and harvesting the results of these functional processes Because the control of the central system is conceptually different from the internal control required by individual functional processes a complete architecture of cognition must incorporate two types of theories of control Type 1 theories of the structure functionality and operation of the controller and type 2 theories of the internal control of functional processes including how and what they communicate to the controller This book presents the current state of the art for both types of theories as well as contrasts among current approaches to human performance models It will be an important resource for professional and student researchers in cognitive science cognitive engineering and human factors Contributors Kevin A Gluck Jerry T Ball Michael A Krusmark Richard W Pew Chris R Sims Vladislav D Veksler John R Anderson Ron Sun Nicholas L Cassimatis Randy J Brou Andrew D Egerton Stephanie M Doane Christopher W Myers Hansj rg Neth Jeremy M Wolfe Marc Pomplun Ronald A Rensink Hansj rg Neth Chris R Sims Peter M Todd Lael J Schooler Wai Tat Fu Michael C Mozer Sachiko Kinoshita Michael Shettel Alex Kirlik Vladislav D Veksler Michael J Schoelles Jerome R Busemeyer Eric Dimperio Ryan K Jessup Jonathan Gratch Stacy Marsella Glenn Gunzelmann Kevin A Gluck Scott Price Hans P A Van Dongen David F Dinges Frank E Ritter Andrew L Reifers Laura Cousino Klein Michael J Schoelles Eva Hudlicka Hansj rg Neth Christopher W Myers Dana Ballard Nathan Sprague Laurence T Maloney Julia Trommersh user Michael S Landy A
