preparation and planning and a source for both quick reference and CPE credits Fundamentals of Transfer Pricing Michael Lang, Giammarco Cotani, Raffaele Petruzzi, 2021-06-18 Transfer pricing is one of the most relevant and challenging topics in international taxation. Over the last century, nearly every country in the world introduced transfer pricing rules into their domestic legislation. Indeed, it was estimated that profit shifting generated by the improper application of transfer pricing rules has resulted in global tax losses worth USD 500 billion for governments, 20% of all corporate tax revenues. It is thus imperative that all tax professionals thoroughly understand the nature of transfer pricing and how the growing body of applicable rules works in practice. In this crucially significant volume, stakeholders from government, multinational companies, international organisations, advisory groups, and academia offer deeply informed perspectives, both general and specific, on the practical application of transfer pricing rules, taking into consideration all the most recent developments. With approximately 160 practical examples and 90 relevant international judicial precedents, the presentation proceeds from general to more specialised topics. Such aspects of the subject as the following are thoroughly analysed: what is transfer pricing and the purpose of transfer pricing rules; the arm's length principle and its application; the consequences of a transaction not being in accordance with the arm's length principle; the transfer pricing methods; the mechanisms to avoid and resolve disputes; the transfer pricing documentation; the attribution of profits to permanent establishments; the transfer pricing aspects of specific transactions such as services, financing, intangibles, and business restructurings. The application of transfer pricing legislation is arguably the most difficult task that taxpayers and tax authorities around the world must face. With this authoritative source of practical guidance, government officials, tax lawyers, in-house tax counsel, academics, advisory firms, the business community, and other stakeholders worldwide will have all the detail they need to move forward in tackling this thorny aspect of the current tax environment. **Fiscal Monitor, October 2022** International Monetary Fund, 2022-10-12 The report explores how fiscal policy can foster resilience by protecting households against large income and employment losses. Governments face increasingly difficult trade-offs in tackling the spikes in food and energy prices when policy buffers are largely exhausted after two years of pandemic. They should prioritize protecting vulnerable groups through targeted support while keeping a tight fiscal stance to help reduce inflation. Building fiscal buffers in normal times would allow governments to respond swiftly and flexibly during adversities. Several fiscal tools such as job retention schemes have proven useful to preserve jobs and income for workers. Social safety nets should be made more readily scalable and better targeted, leveraging digital technologies. Exceptional support to firms should be reserved for severe situations and requires sound fiscal risk management. Credit Method Compatibility and Constraints under EU Law Rita Julien, 2022-01-13 As European Union (EU) Member States seek to counteract base erosion and profit shifting (BEPS) practices while avoiding new obstacles to the EU's internal market such as double taxation, the credit method, also known as the foreign tax credit, is one of the essential tools in this balancing act, yet it is one that has given rise to various EU law

challenges and questions This invaluable book the first in depth study of the EU law constraints on designing the credit method delineates the EU law boundaries within which the Member States must operate when they implement this method of tax relief For the first time the Court of Justice of the European Union CJEU cases that may affect directly or indirectly the credit method and its main components are systematically identified and analysed in order to extract the legal findings and principles that define the contours within which the Member States can manoeuvre when considering EU compatible approaches to the credit method To this end among others this book offers an extensive study of the historical legal developments of the credit method an overview of the key design features of the credit method considering the optional variable components such as the credit limitation maximum creditable amount that tailor it to different legal and policy considerations an analysis of the legal constraints on the key features of the credit method flowing from CJEU case law on the fundamental freedoms considering the impact of landmark cases and concepts e g Schumacker neutralization the EU law implications based on the type of credit method direct indirect imputation and the feature of the credit method e g credit limitation credit carryforward and examples to clearly and concisely illustrate the basic operation of the credit method and some of the main calculation and EU law issues The author s doctoral dissertation on which the book is based was awarded the Wolfgang Gassner Science Prize 2020 and the European Doctoral Tax Thesis Award 2020 As a timely comprehensive and practical study of the relationship between the credit method and EU law this book will be welcomed by lawyers and other professionals working with taxation matters as well as by tax policymakers and academics in the fields of international and European tax law
