

MARK SCHEME for the May/June 2013 series

0460 GEOGRAPHY

0460/22

Paper 2, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Universities and Innovation Economies Peter Murphy,2016-02-24 Students drop out of universities in large numbers many graduate to jobs that do not require a degree and a large number learn little at university whilst graduate salaries have shrunk over time and student loan debt and default have grown University research achievements have declined while university administration has expanded massively The contemporary university is mired in auditing regulation waste and aimlessness and its contribution to serious social innovation has deteriorated markedly The miserable state of the universities reflects a larger social reality as bureaucratic capitalism has replaced creative capitalism *Universities and Innovation Economies* examines the rise and fall of the mass university and post industrial society considering how we might

revitalize economic and intellectual creativity Looking to a much more inventive social and economic paradigm to drive long term growth the author argues for a smaller leaner more effective university model one capable of delivering a greater degree of high level discovery and creative power A potent critique of the post industrial mass university that urges a reimagination of universities as places of discovery and invention this book will appeal to readers interested in higher education creativity social theory the sociology of work and organisations political economy pedagogy and public policy
