of pathologies such as infection inflammation cancer cardiovascular and neurodegenerative disorders In keeping with the existence of cross regulatory interactions between Fe homeostasis and the pathophysiology of these diseases further investigations on the mechanisms that provide cellular and systemic adaptation to tissue Fe overload are instrumental for future therapeutic approaches Thus we encourage our colleagues to submit original research papers reviews perspectives methods and technology reports to contribute their findings to a current state of the art on a comprehensive overview of the importance of iron metabolism in pathophysiologic conditions The art of The Faerie Queene Richard Danson
