Advancements in Materials and Systems for Thermal Energy Storage Andrea Frazzica, Luisa F. Cabeza, 2018-08-28

This book presents the latest advances in thermal energy storage development at both the materials and systems level. It covers various fields of application including domestic, industrial and transport as well as diverse technologies such as sensible latent and thermochemical. The contributors introduce readers to the main performance indicators for thermal storage systems and discuss thermal energy storage (TES) technologies that can be used to improve the efficiency of energy systems and increase the share of renewable energy sources in numerous fields of application. In addition to the latest advances, the authors discuss the development and characterization of advanced materials and systems for sensible latent and thermochemical TES as well as the TES market and practical applications. They also report on and assess the feasibility of uniform characterization protocols and main performance indicators compared to previous attempts to be found in the literature. The book will help to increase awareness of thermal energy storage technologies in both the academic and industrial sectors while also providing experts new tools to achieve a uniform approach to thermal energy storage characterization methods. It will also be of interest to all students and researchers seeking an introduction to recent innovations in TES technologies.

Financial Econometrics: Bayesian Analysis, Quantum Uncertainty, and Related Topics Nguyen Ngoc Thach, Vladik Kreinovich, Doan Thanh Ha, Nguyen Duc Trung, 2022-05-28 This book overviews latest ideas and developments in financial econometrics with an emphasis on how to best use prior knowledge e.g. Bayesian way and how to best use successful data processing techniques from other application areas e.g. from quantum physics. The book also covers applications to economy related phenomena ranging from traditionally analyzed phenomena such as manufacturing, food industry and taxes to newer to analyze phenomena such as cryptocurrencies, influencer marketing, COVID 19 pandemic, financial fraud, detection, corruption and shadow economy. This book will inspire practitioners to learn how to apply state of the art Bayesian, quantum and related techniques to economic and financial problems and inspire researchers to further improve the existing techniques and come up with new techniques for studying economic and financial phenomena. The book will also be of interest to students interested in latest ideas and results.

Prediction and Causality in Econometrics and Related Topics Nguyen Ngoc Thach, Doan Thanh Ha, Nguyen Duc Trung, Vladik Kreinovich, 2021-07-26 This book provides the ultimate goal of economic studies to predict how the economy develops and what will happen if we implement different policies. To be able to do that we need to have a good understanding of what causes what in economics. Prediction and causality in economics are the main topics of this book's chapters. They use both more traditional and more innovative techniques including quantum ideas to make predictions about the world economy, international trade, exchange rates, about a country's economy, gross domestic product, stock index, inflation rate and about individual enterprises, banks and micro finance institutions, their future performance including the risk of bankruptcy, their stock prices and their liquidity. Several papers study how COVID 19 has influenced the world economy. This book helps practitioners and researchers to

learn more about prediction and causality in economics and to further develop this important research direction

Proceedings of the 2022 Eurasian OpenSees Days Fabio Di Trapani, Cristoforo Demartino, Giuseppe Carlo Marano, Giorgio Monti, 2023-04-19 This book highlights the latest advances innovations and applications in the field of structural and geotechnical engineering as presented by leading international researchers and engineers at the 2nd Eurasian Conference on OpenSees Open System for Earthquake Engineering Simulation EOS held in Turin Italy on July 7 8 2022 The conference was meant to give an overview on the latest developments made with the OpenSees framework as well as to present research and practical outcomes in which OpenSees plays an important role Conference topics cover cutting edge applications of OpenSees in the field of structural and geotechnical engineering the development of new elements and materials and also the development of new pre and post processors The contributions which were selected by means of a rigorous international peer review process present a wealth of exciting ideas that will open novel research directions and foster multidisciplinary collaboration among different specialists Journal of the National Cancer Institute, 1990 **The Ecology of**

Agricultural Landscapes Stephen K. Hamilton, Julie E. Doll, G. Philip Robertson, 2015-03-03 Evidence has been mounting for some time that intensive row crop agriculture as practiced in developed countries may not be environmentally sustainable with concerns increasingly being raised about climate change implications for water quantity and quality and soil degradation This volume synthesizes two decades of research on the sustainability of temperate row crop ecosystems of the Midwestern United States The overarching hypothesis guiding this work has been that more biologically based management practices could greatly reduce negative impacts while maintaining sufficient productivity to meet demands for food fiber and fuel but that roadblocks to their adoption persist because we lack a comprehensive understanding of their benefits and drawbacks The research behind this book based at the Kellogg Biological Station Michigan State University and conducted under the aegis of the Long term Ecological Research network is structured on a foundation of large scale field experiments that explore alternatives to conventional chemical intensive agriculture Studies have explored the biophysical underpinnings of crop productivity the interactions of crop ecosystems with the hydrology and biodiversity of the broader landscapes in which they lie farmers views about alternative practices economic valuation of ecosystem services and global impacts such as greenhouse gas exchanges with the atmosphere In contrast to most research projects the long term design of this research enables identification of slow or delayed processes of change in response to management regimes and allows examination of responses across a broader range of climatic variability This volume synthesizes this comprehensive inquiry into the ecology of alternative cropping systems identifying future steps needed on the path to sustainability **Building Resilient**

Healthcare Systems With ICTs Ndayizigamiye, Patrick, Kante, Macire, 2022-03-11 One of the challenges encountered in the provision of healthcare is the inability of healthcare systems to adapt to or respond adequately to adverse events pandemics or otherwise especially in settings with limited resources ICTs can be built into healthcare systems to detect and or mitigate

adverse events The COVID 19 pandemic has showcased the opportunities that are brought forth by ICTs such as the adoption of online consultations by doctors and other innovative ways of providing healthcare despite public health regulations travel restrictions and fears tied to physical appointments Beyond the COVID 19 era there is a need to reimagine how ICTs could be adopted in healthcare to ensure resilience in the advent of any of these future adverse events Building Resilient Healthcare Systems With ICTs highlights the various ways ICTs could assist in building resilience within healthcare systems and the various contexts in which resilience could be built within healthcare systems It portrays practical implications of and value derived from building resilience in healthcare systems Covering topics such as electronic health information systems multimodal representation and supply chain management this book is an essential resource for healthcare executives government officials researchers computer engineers and academicians

Reproducibility and Rigour in Computational Neuroscience Sharon Crook,Andrew P. Davison,Robert Andrew McDougal,Hans Ekkehard Plesser,2020-07-09 Pathways to Prosperity in Rural Malawi Andrew Dabalén,Alejandro de la Fuente,Aparajita Goyal,Wendy Karamba,Tomomi Tanaka,2017-07-06 By most accounts rural Malawi has lacked dynamism in the past decade Growth has been mostly volatile in large part due to unstable macroeconomic fundamentals evidenced by high inflation fiscal deficits and interest rates When rapid economic growth has materialized the gains have not always reached the poorest Poverty remains high and the rural poor face significant challenges in consistently securing enough food Several factors contribute to stubbornly high rural poverty They include a low productivity and non diversified agriculture

macroeconomic and recurrent climatic shocks limited non farm opportunities and low returns to such activities especially for the poor and poor performance from some of the prominent safety net programs The Report proposes complementary policy actions that offer a possible path for a more dynamic and prosperous rural economy The key pillars of this comprise macroeconomic stability increased productivity in agriculture faster urbanization better functioning safety nets and more inclusive financial markets Some recommendations call for a reorientation of existing programs such as the Malawi Farm Input Subsidy Program FISP and the Malawi Social Action Fund Public Works Program MASAF PWP Others identify promising new areas of intervention such as the introduction of digital IDs and biometric technologies to enhance the reach of mobile banking and deepen financial inclusion Finally and importantly the report recommends the scaling up of investments on girls secondary education to curb early child marriage and early child bearing among adolescents This will empower women at home and work and bend the trajectory of fertility rates in rural areas in order to boost human development and reduce poverty
