Sweet and Deadly Murray Carpenter, 2025-03-25 How Coca Cola makes Americans sick and makes sure we don't know it. If we knew that Coca Cola was among the deadliest products in our diet, would we continue drinking it in such great quantities? The Coca Cola Company has gone to extraordinary lengths to make sure we don't find out, as this damning exposé makes patently clear. Marshaling the findings of extensive research and deep investigative reporting, Murray Carpenter describes in *Sweet and Deadly* the damage Coke does to America's health and the remarkable campaign of disinformation conducted by the company to keep consumers in the dark. Sugar-sweetened beverages are the single item in the American diet that most contributes to the epidemic of chronic disease, in particular obesity, type 2 diabetes, and cardiovascular disease, and Coca Cola is America's favorite sugar-sweetened beverage by far. Carpenter details how the Coca Cola corporation's sophisticated shadow network has masterfully spread disinformation for decades to hide the health risks of its product from consumers, risks disproportionately borne by Black, brown, and low-income communities. Working from a playbook of obfuscation and pseudoscience that has worked well for other harmful products, from tobacco and trans fats to opioids, Coca Cola has managed to maintain an aura of goodness and happiness. This eye-opening book finally and fully reveals the truth behind that aura.

The Moral Wager Malcolm Murray, 2007-05-05 In the following chapters, I offer an evolutionary account of morality and from that extrapolate a version of contractarianism I call consent theory. Game theory helps to highlight the evolution of morality as a resolution of interpersonal conflicts under strategic negotiation. It is this emphasis on strategic negotiation that underwrites the idea of consent. Consent theory differs from other contractarian models by abandoning reliance on rational self-interest in favour of evolutionary adaptation. From this, more emphasis will be placed on consent as natural convergence rather than consent as an idealization. My picture of contractarianism then ends up looking more like the relativist model offered by Harman rather than the rational or pseudo-rational model offered by Gauthier, let alone the Kantian brands of Rawls or Scanlon. So at least some of my discussion will dwell on why it is no loss to abandon hope for the universal categorical morality that rational models promise. In the introduction, I offer the betting analogy that underwrites the remaining picture. There are some bets where the expected utility is positive though the odds of winning on this

particular occasion are exceedingly low. In such cases, we cannot hope to give an argument that taking the bet is rational. The only thing we can say is that those predisposed to take this kind of bet on these kinds of occasions will do better than those with other dispositions so long as such games occur often enough.
