System Overview

The MXL fire panel is a microprocessor-based advanced protection system. The use of the MXL system's unique multiprocessor 'network' design; as well as its ability to utilize analog and conventional detection devices, makes the MXL panel a highly flexible and reliable fire-control system.

The MXL panel is ideally suited for commercial, industrial and institutional fire-detection and notification applications. The MXL system complies with the requirements of NFPA Standard 72, and is listed by Underwriters Laboratories (UL), via its UL 864 9th Edition. Underwriter's Laboratories of Canada (ULC) also lists the MXL panel for fire applications.

The MXL system is approved by CSFM, NYCFD and the City of Chicago for use in those specific locales.

In addition to the standard fire applications, MXL is UL Listed, under the category 'UUKL for Smoke-Control.' The MXL panel can be used as a listed fireman's smoke-control station in high-rise office buildings, malls and other multi-level or vast structures. The MXL system also complies with Uniform Building Code Section 905 requirements for smoke control.

The MXL panel is UL Listed for releasing Sinceris™ Engineered Fire Suppression System. MXL follows the releasing requirements specified in the NFPA 2001.
