The Internet of Things Christian Floerkemeier,Marc Langheinrich,Elgar Fleisch,Friedemann Mattern,Sanjay E. Sarma,2008-03-15 This volume contains the proceedings of the Internet of Things IOT Conference 2008 the rst international conference of its kind The conference took place in Zurich Switzerland March 26 28 2008 The term Internet of Things has come to describe a number of technologies and research disciplines that enable the ternet to reach out into the real world of physical objects Technologies such as RFID short range wireless communications real time localization and sensor networks are becoming increasingly common bringing the Internet of Things into industrial commercial and domestic use

IOT 2008 brought together leading researchers and practitioners from both academia and industry to facilitate the sharing of ideas, applications and research results. IOT 2008 attracted 92 high quality submissions from which the technical program committee accepted 23 papers resulting in a competitive 25% acceptance rate. In total there were over 250 individual authors from 23 countries representing both academic and industrial organizations. Papers were selected solely on the quality of their blind peer reviews. We were fortunate to draw on the combined experience of our 59 program committee members coming from the most prestigious universities and research labs in Europe, North America, Asia and Australia. Program committee members were aided by no less than 63 external reviewers in this rigorous process in which each committee member wrote about 6 reviews. The total of 336 entered reviews resulted in an average of 3.7 reviews per paper or slightly more than 1000 words of feedback for each paper submitted. *Willing's Press Guide and Advertisers' Directory and Handbook*, 1965

Copyright Licensing can no longer be considered purely from the perspective of the licensor's home territory. This practical and wide-ranging reference work provides comprehensive coverage of the law and practice of cross-border licensing in a number of major territories including China, the EU, India, Mexico, Russia, Singapore, South Africa and the USA. The book, written by expert authors with insight from practice and from their home jurisdictions, focuses on both copyright licensing and competition law and specifically the interrelation between these legal fields. The book is uniquely structured to provide both thematic coverage and detailed analysis of each territory's applicable laws and regulations, highlighting and addressing the legal issues that are most critical in and relevant to licensing practice. *Cross-Border Copyright Licensing* is an essential starting point for anyone considering or advising on the implementation or enforcement of a copyright licensing program in either developed and emerging markets.
