Health Services Research Methods By Leiyu Shi:

Health Services Research Methods Leiyu Shi, 1997 Health services research is a rapidly expanding field of inquiry. Typically health services researchers conduct investigation within different fields: health policy, health systems research, health outcomes research, clinical epidemiology, technology assessment, clinical decision analysis, operations research, health economics, medical sociology, medical anthropology, to name a few. An important impetus to the rapid development of health services research is the breathtaking advance of the medical enterprises; there are a number of features of this book. First, the book intends to be a practical guide for those interested in health services research. Steps will be delineated and illustrated clearly in the text, tables, and figures. Second, health services research examples are used throughout. Third, the book integrates research design with analysis. While this is not a statistical textbook, commonly used statistics are discussed in terms of their use for different levels of analysis and the nature of the variables. Fourth, the book also provides resources for students and researchers of health services.

At the same time, healthcare has become so costly that it can easily bankrupt governments and impoverish individuals and families. Health services research is a highly multidisciplinary field including such areas as health administration, health economics, medical sociology, medicine, political science, public health, and public policy. The Encyclopedia of Health Services Research is the first single reference source to capture the diversity and complexity of the field. With more than 400 entries, these two volumes investigate the relationship between the factors of cost, quality, and access to healthcare and their impact upon medical outcomes such as death, disability, disease, discomfort, and dissatisfaction with care.

Key Features: Examines the growing healthcare crisis facing the United States; Encompasses the structure, process, and outcomes of healthcare; Aims to improve the equity, efficiency, effectiveness, and safety of healthcare by influencing and developing public policies; Describes healthcare systems and issues from around the globe.

Key Themes: Access to Care, Accreditation, Associations, Foundations, and Research Organizations; Biographies of Current and Past Leaders; Cost of Care; Economics; Finance and Payment Mechanisms; Disease; Disability; Health and Health Behavior; Government and International Healthcare Organizations; Health Insurance; Health Professionals and Healthcare Organizations; Health Services Research; Laws, Regulations, and Ethics; Measurement Data Sources and Coding and Research Methods; Outcomes of Care; Policy Issues; Healthcare Reform and International Comparisons; Public Health; Quality and Safety of Care; Special and Vulnerable Groups.
