Health-Enabled Spaces Fadi Al-Turjman,2023-06-16 Artificial Intelligence of Health Enabled Spaces AIOH has made a
number of revolutionary advances in clinical studies that we are aware of Among these advances intelligent and medical
services are gaining a great deal of interest Nowadays AI powered technologies are not only used in saving lives but also in
our daily life activities in diagnosing controlling and even tracking of COVID 19 patients These AI powered solutions are
expected to communicate with cellular networks smoothly in the next generation networks 5G 6G and beyond for more
effective critical medical applications This will open the door for other interesting research areas This book focuses on the
development and analysis of artificial intelligence AI model applications across multiple disciplines AI based deep learning
models fuzzy and hybrid intelligent systems and intrinsic explainable models are also presented in this book Some of the
fields considered in this smart health oriented book include AI applications in electrical engineering biomedical engineering
environmental engineering computer engineering education cyber security chemistry pharmacy molecular biology and
tourism This book is dedicated to addressing the major challenges in fighting diseases and psychological issues using AI
These challenges vary from cost and complexity to availability and accuracy The aim of this book is hence to focus on both

the design and implementation aspects of AI based approaches in the proposed health related solutions Targeted readers are from varying disciplines who are interested in implementing the smart planet environments vision via intelligent enabling technologies Digital Health Applications: Acceptance, Benefit Assessment, and Costs from the Perspective of Patients and Medical Professionals Tonio Schoenfelder ,Tom Schaal,Anja Mocek,2024-11-12 Digital health applications DHAs are increasingly being used in patient care in various healthcare systems around the world In some countries such as Belgium and Germany legal frameworks already allow for DHA integration into standard care and their prescription and uniform reimbursement via the patient s health insurance In many other European countries and the USA such a process is still in development DHAs are primarily used by patients themselves but also in consultation with physicians therapists or other healthcare providers They offer the potential for improved health outcomes and increased access to health services especially in rural areas and may lead to an overall improvement in the quality of care The validity of studies on the effects of DHAs on patients and health care systems in general is currently limited since study methods applied do often not allow for drawing causal relationships and most studies focus only on patient outcomes but do not assess how traditional care processes need to be adapted so that DHAs can be effective Therefore unambiguous evidence on which patient relevant outcomes can be improved specifically as a result of integrating DHA into the process of care is currently lacking
