

The figure below shows part of an algorithm that has been written in pseudo-code.

There is an error in the algorithm.

The algorithm should:

- get the start year and end year from the user
 - check that the start year is before the end year
 - check that the start year is before 2000
 - calculate the difference between the two years after a valid start year has been entered.
-
- Line numbers are included but are not part of the algorithm.

2    REPEAT
