

Dishwasher Installation

STEP 11 SLIDE DISHWASHER INTO CABINET

IMPORTANT – Do not push against front panel with knees. Damage will occur.

- Grasp the sides of the front panel and slide the dishwasher into the opening a few inches at a time. Pull the drain hose and power cord, if equipped, through the holes in the adjacent cabinet while sliding the dishwasher into position.

Do not push against front door panel with knee. Damage to the door panel will occur.

- Check the tub insulation blanket, if equipped, to be sure it is smoothly wrapped around the tub. It should not be "bunched up" and it must not interfere with the door springs. If the insulation is "bunched up" or interfering with the springs, straighten and re-center the blanket prior to sliding the dishwasher into its final position.
- Make sure the drain hose is not kinked under or behind the dishwasher.
- Make certain the house wiring, drain line and water line do not interfere with components under the dishwasher.
- The dishwasher tub flange should be approximately 3/4" behind the face of the adjacent cabinet. Refer to figure.

Tip: Avoid unnecessary service charges for panel damage.

Do not press on the center of panel with hands or knees when sliding dishwasher into position.

STEP 12 LEVEL DISHWASHER

IMPORTANT – Dishwasher must be level for proper dish rack operation, wash performance and door operation. The dishwasher must be leveled left to right and front to back. This ensures the dish racks will not roll in or out on their own, circulation water will flow to the pump inlet, and the door will close without hitting the side of the tub.

- Remove the lower dish rack and place a level on the door and lower rack track as shown in figure.

- Adjust the level of the dishwasher by individually turning the 4 legs on the bottom of the dishwasher as shown. Ensure all 4 legs are firmly in contact with the floor.

- The dishwasher is properly leveled when the level indicator is centered left to right and front to back. Also, the dishwasher door should close without hitting the side of the tub.
- Replace the lower rack.

Tip: Prevent unnecessary service charges. Verify dishwasher is leveled.

Pull the dish racks half way out. They should stay put. Open and close the door. The door should fit in the tub opening without hitting the side of the tub. If the racks roll on their own, or the door hits the side of tub, re-level the dishwasher.
