Writing a Research Paper in Political Science Lisa A. Baglione, 2018-12-31 Even students capable of writing excellent essays still find their first major political science research paper an intimidating experience. Crafting the right research question, finding good sources, properly summarizing them, operationalizing concepts and designing good tests for their hypotheses, presenting and analyzing quantitative as well as qualitative data are all tough going without a great deal of guidance and encouragement. *Writing a Research Paper in Political Science* breaks down the research paper into its constituent parts and shows students what they need to do at each stage to successfully complete each component until the paper is finished. Practical summaries, recipes for success, worksheets, exercises and a series of handy checklists make this a must-have supplement for any writing-intensive political science course. New to the Fourth Edition, a non-causal research paper woven throughout the text offers explicit advice to guide students through the research and writing process. Updated and more detailed discussions of plagiarism, paraphrases, drop-ins and transcripts help to prevent students from misusing sources in a constantly changing digital age. A more detailed discussion of fake news and disinformation shows students how to evaluate and choose high-quality sources as well as how to protect oneself from being fooled by bad sources. Additional guidance for writing abstracts and creating presentations helps students to understand the logic behind abstracts and prepares students for presentations in the classroom, at a conference and beyond. A greater emphasis on the value of qualitative research provides students with additional instruction on how to do it.
