

One location has the HOT Wire and the other has the LOAD

Neutral wire is a bundle of White (usually) wires in the box and are not used with standard rocker switch

Standard 3-Way Switch Neutral in Both Locations

On a standard 3-way switch there are 3 terminals and a ground. 2 Traveller Terminals that are brass and 1 Common terminal

The Common Terminals are always Hot on 1 switch and Load on the other

If we know which wires were connected to the COMMON terminal on the original switches then we know 1 is HOT the other is LOAD and we can figure which one is which by removing the switch turning on the breaker and testing with the voltage pin. Once we know where the HOT is then we know the LOAD is in the other box.
