PSYCHOLOGY OF ADDICTION

In all the more prominent interdisciplinary contexts of the systematic struggle against addiction, psychology has recognized as a profession its space for action, both in the area of prevention and in the field of suppression of addiction and treatment of addicts. But it may have been less exploited as science, and more as an aiding activity. However, psychology is increasingly actively involved in solving socially relevant public health issues in areas that have recently been "reserved" for the medical profession until recently. Psychologists as members of multidisciplinary teams currently have insufficiently defined, but solidly affirmed and fully recognizable and recognized positions of health care professionals in the health care system, as well as the position of professional associates in the system of education, social care and other systems. The independent role of a psychologist has so far been linked solely to the clinical approach to addiction treatment and addictive behavior, while also limiting it to reactive action (when the problem arises) while proactive action remains inadequate and sporadic and hence inefficient. Preventive activities rely heavily on specific education, psychoeducation and supportive practices, so psychology "has become" the only profession that in the system of early identification of problems, prevention, early interventions and later treatment (addicts) can offer a complete set of scientific knowledge based interventions. This psychology as an expert gives a leading role in trying to make the problem of addiction as small as it is quite certain that in the near future this problem will not come to an end. Inadequate to psychology is that a relatively small number of psychologists deal with addiction psychology, and those who are too busy dealing with them are investigating the phenomenon, analyzing the opportunities and limitations of the profession and failing to publicize the texts about new knowledge and experience.

How to Design Studies and Write Research Proposals - E-BOOK Kader Parahoo, 2024-03-15 If you're writing a research proposal for the first time this is the book for you. It's the only text on the market that guides you through the entire process from designing a research study to submitting a successful proposal. It covers everything from formulating the research question to selecting the research methodology, collecting data, and navigating ethics, all supported with plenty of practical tips, real-life examples, and checklists for honing your proposal. How to Design Studies and Write Research Proposals is written by nursing research expert Professor Kader Parahoo, whose work is loved by students for its accessible writing style and practical approach. Takes readers through all the steps of the research process from developing research questions to research impact. Deals with quantitative, qualitative, and mixed methods studies. Provides examples of real proposals, most of which are freely accessible online. Makes reference to research studies and research proposals from a wide range of countries. Provides examples from the fields of nursing, allied health sciences, and social work. Provides detailed checklists of items to include in proposals at the end of each chapter. Provides useful references and links that readers can access to further explore issues raised in the text. Written in a language and style that makes research easier to understand.

Psychology Research Methods Elizabeth Brondolo, 2021-04-25 *Psychology Research Methods: A Writing Intensive Approach* provides instruction in critical concepts and processes in behavioral science research methods and skills in formulating and writing research papers. The book creates an experiential approach to learning with chapters organized around the task of writing a complete APA style research paper. The chapters consist of instructional text excerpts from published research articles and learning activities. The reading activities help students develop skills in reading scientific research, evaluating and analyzing scientific information, and assembling evidence to make a scientific argument. The writing activities help students to break down the process of writing a research paper into manageable and meaningful components. As students complete the chapter activities, they assemble their research paper. The book teaches research methods in a clinical context inspired by the National Institute of Health's Science of Behavior Change Program. Students acquire knowledge about research methods as they read research articles about behavioral health disorders, including studies about their prevalence, causes, and treatment. Teaching research methods with a clinical focus helps students appreciate the value of psychological research. *Psychology Research Methods: A Writing Intensive Approach* provides instruction in critical concepts and processes in behavioral science research methods and skills in formulating and writing research papers.
