practical hands on exercises working with things From these workshops a series of installations emerged straddling the boundaries of art and academia These installations served as artistic academic interventions during the final symposium and are featured alongside the other academic contributions to this volume Throughout this process two main themes emerged and structure Part II Movement and Growth and Part III Dissolution and Traces of the present volume respectively Part I Conceptual Grounds consists of two chapters offering conceptual takes on things and ties one from anthropology and one from archaeology As interrelated modes of becoming materiality and connectivity make it necessary to coalesce things and ties into thing ties an insight toward which the chapters and interventions came from different sides and one in which the initial proposition of the editors still shines through Throughout the pages of this volume we invite the reader to travel beyond imaginaries of a universe of separate planets united by connections and to venture with us instead into the thicket of thing ties in which we live

Lifelogging for Organizational Stress Measurement Thomas Fischer, René Riedl, 2018-09-26 In recent decades organizational stress researchers have repeatedly called for more longitudinal studies This book argues that tools and devices that have been developed for the private or organizational domains could be helpful when it comes to studying longitudinal phenomena as they offer unobtrusive measurement and are frequently employed by many individuals in daily life In particular the book examines lifelogging a research field that addresses the computer based collection of individual experiences Further it highlights areas in organizational stress research that benefit from insights in the lifelogging literature and provides a summary of tools that can be used for stress measurement It also offers an overview of the latest research and current developments on lifelogging and organizational stress for researchers interested in self measurement of stress related effects and for organizational stress researchers
