

REFLECTIVE JOURNAL

The main aim of this journal is to keep a record of my thoughts, notes, reflections and questions about this subject, and some implementation activities related to this subject that I have carried out in my classes. All the information we can find in this journal is connected, however I have decided to classify them by topics.

❖ Assessment & Evaluation:

I would like to center this reflection on my personal opinion about the fact of assessing and being assessed: how people feel, if they like or not and why, etc.

In my opinion the feeling people have when we are assessed changes through the years and it different depending on the kind you are. When children are at school they feel that assessment is something compulsory for them, but they do not really feel the pressure that, for example, students at high school feel because they know that they have to achieve the goals and the targets and unless they do it, they will not promote. On the other hand, we can think of assessment from the teachers' or parents' perspective. If we focus on parents' perspective, assessment is something good because it facilitates them the fact of knowing that their children are working at school and if they are truly learning or not. Now, I will focus on teachers' perspective. For teachers assessment is something great because it gives information about students and their progress in the learning process, about our own job (because we are assessed by others teachers of self-assessment) and information about the quality of the tools we use in our classes.

❖ Formative & Summative Assessment:

I would like to mention that, before studying this unit it was difficult for me to understand the difference between formative and summative assessment. However, now, I am able to distinguish them and that's why I would like to refers on these terms in the following lines. After each explanation, I will give you some examples of how I use each of the assessments with my students.

- Formative assessment provides explicit feedback to both, teacher and students, in order to improve the teaching-learning process, it means, the
