 Ninad Deshpande, Sivaram Pothukuchi, 2023-02-10 Demystify automation and solve control related problems with the help of real world products and case studies put together by two industrial automation experts Key Features Real life applications and case studies of automation curated from authors rich experience Overcome tricky automation and control issues in the manufacturing process Implement automation in manufacturing for higher efficiency and productivity in the industry Book Description Engineering disciplines focus mainly on programming control systems while the challenges they overcome or their industry applications largely go uncovered leaving a huge gap between the theory and industry practices This leads to engineers learning about subjects without actually understanding their purpose and entering the industry needing months of training The Art of Manufacturing cuts across pedantic theory and reaches practical applications You ll begin your learning journey by starting from the product and moving backward to the manufacturing landscape factories machines and finally to the automation and control challenges faced in manufacturing The book builds on the authors valuable on field experience providing a detailed view of the manufacturing of real world products while simultaneously providing various analogies and references to daily tasks As you advance through the chapters you ll work on interesting control problems and find out how to overcome them in applications The concluding chapters offer you a sneak peek into the future of automation and factories By the end of this book you ll be able to relate a real world product with an associated control challenge and discover ways to overcome these challenges What you will learn Understand the role of machines factories and plants in manufacturing a product Explore the manufacturing landscape and its continuous evolution Use practical applications to mitigate control challenges in manufacturing Resolve implementation challenges of various applications in a machine Discover how humans and automation work together in factories Find out how to solve the same control challenge in different ways Discover links between Industry 3 0 Industry 4 0 digitalization and lean manufacturing Who this book is for The book will interest an inquisitive student of engineering electrical electronics mechatronics E TC who wishes to explore beyond the classroom textbook content It will also serve as a teacher s handbook helping the lecturer bring the flair of industry into the classroom Moreover it will be useful for a practicing engineer with cross disciplinary knowledge that is needed to manufacture any real product You must have basic knowledge of electronics electrical and mechatronics engineering **Transactions of the North American Manufacturing Research Institution of SME.** ,1992 **NASA Tech Briefs** ,1993 **Proceedings of the 10th International Conference on Mechanical, Automotive and Materials Engineering** John P. T. Mo, 2024-09-24 This book consists of selected papers presented at the 10th International Conference on Mechanical Automotive and Materials Engineering CMAME 2023 held in Da Nang Vietnam on 20 22 December 2023 Readers find this book a vehicle for the dissemination of research results on latest advances made in this area It is expected that the publication of the research papers with the advanced topics listed in this book will further promote high standard academic research in the field and

make a significant contribution to the development of human society Topics that will be covered in this book include but not limited to materials science and engineering engine system design and power machinery mechanical design manufacture and automation design and analysis of robot systems automobile design and manufacturing engineering thermal and fluid mechanics analysis aircraft structural design and system control control theory and engineering applications electronic information technology This book is intended for researchers engineers and advanced postgraduate students in the fields of automotive production industrial engineering and design **Advances in Robot Kinematics 2024** Jadran

Lenarčič, Manfred Husty, 2024-07-02 This book is aimed at researchers specializing in the kinematics of robot mechanisms as well as at doctoral students in guiding their research work A spectrum of the latest achievements in kinematics analysis modelling simulation design and control is covered New theories and methods are applied to serial parallel and cable driven mechanisms for use in industrial or service robotics The systems range from being less than fully mobile to kinematically redundant and over constrained Forty nine papers are included arranged in seven chapters as presented at the 19th Symposium on Advances in Robot Kinematics 2024 The symposium which has been held since 1988 was organized this time in Ljubljana Slovenia where it began thirty six years ago The papers have been rigorously selected based on peer review and are arranged in chapters randomly as is the prevailing tradition of these symposia In doing so we aim to give equal emphasis to each of these achievements
