Continuing the Journey to Reposition Culture and Cultural Context in Evaluation Theory and Practice Stafford Hood,Rodney Hopson,Henry Frierson,2014-12-01 Racial ethnic linguistic and cultural diversity has become of global importance in places where many never would have imagined Increasing diversity in the U S Europe Africa New Zealand and Asia strongly suggests that a homogeneity based focus is rapidly becoming an historical artifact Therefore culturally responsive evaluation CRE should no longer be viewed as a luxury or an option in our work as evaluators The continued amplification of racial ethnic linguistic and cultural diversity and awareness among the populations of the U S and other western nations insists that social science researchers and evaluators inextricably engage culturally responsive approaches in their work It is unacceptable for most mainstream university evaluation programs philanthropic agencies training institutes sponsored by federal agencies professional associations and other entities to promote professional evaluation practices that do not attend to CRE Our global demographics are a reality that can be appropriately described and studied within the context of complexity theory and theory of change e g Stewart 1991 Battram 1999 And this perspective requires a distinct shift from simple linear cause effect models and reductionist thinking to include more holistic and culturally responsive approaches The development of policy that is meaningfully responsive to the needs of traditionally disenfranchised stakeholders and that also optimizes the use of limited resources human natural and financial is an extremely complex process Fortunately we are presently witnessing developments in methods instruments and statistical techniques that are mixed methods in their paradigm designs and likely to be more effective in informing policymaking and decision making Culturally responsive evaluation is one such phenomenon that positions itself to be relevant in the context of dynamic international and national settings where policy and program decisions take place One example of a response to address this dynamic and need is the newly established Center for Culturally Responsive Evaluation and Assessment CREA in the College of Education at the University of Illinois at Urbana Champaign CREA is an outgrowth of the collective work and commitments of a global community of scholars and practitioners who have contributed chapters to this edited volume It is

an international and interdisciplinary evaluation center that is grounded in the need for designing and conducting evaluations and assessments that embody cognitive cultural and interdisciplinary diversity so as to be actively responsive to culturally diverse communities and their aspirations The Center s purpose is to address questions issues theories and practices related to CRE and culturally responsive educational assessment Therefore CREA can serve as a vehicle for our continuing discourse on culture and cultural context in evaluation and also as a point of dissemination for not only the work that is included in this edited volume but for the subsequent work it will encourage

Zatzkis, 2024-04-12 The author has been an energetic engaged attorney enjoying the mental challenge of preparing and trying cases He simultaneously was drawn to the beauty of the mountains of Colorado where he loved to share his passion with family and friends His was a life full of adventures many with risks and some leading to personal injuries The author lays himself bare addressing the challenges he faced including success and failures He writes about a philosophy of life to which he credits his success and discusses the positive impact this philosophy had on all aspects of his life **Desert Journey** Jerry Burgener, 2007-07 Time and experiences had left lines on my face which had grown deeper like the dusty trails of my life that I seemed to be retracing Reeling from yet another relationship failure Jerry travels to the American Southwest to

spend a couple of months riding his horse savoring the warm weather and finding respite from the daily grind But what begins as a simple escape to the wide open spaces of Arizona soon becomes a powerful odyssey of self discovery When Jerry comes upon an Indian named Tom in the middle of the Superstition Mountains he senses that the meeting is no casual encounter Wise and unreserved Tom speaks to Jerry with a knowingness that both unnerves and captivates him Jerry is compelled to return to the mountain again and again to accept Tom s challenges exercises and assignments for living in the moment tuning into the love all around him and honoring a connection to Spirit With Tom as his guide Jerry uses dreams and visions of his own past lives to make sense of his modern reality Tom s lessons cause Jerry to question long held beliefs but they also afford him the insight he needs to move beyond pain and make his metaphysical journey toward inner peace and enlightenment

Ambivalent Journey Richard C. Jones,2022-09-13 The changing political and economic relationships between Mexico and the United States and the concurrent U S debate over immigration policy and practice demand new data on migration and its economic effects In this innovative study Richard C Jones analyzes migration patterns from two subregions of north central Mexico Coahuila and Zacatecas to the United States He analyzes and contrasts the characteristics of the two migrant populations and interprets the economic impacts of migration upon both home of migration upon both home areas Jones s findings refute some common assumptions about Mexican migration while providing a strong model for further research Jones s study focuses on the ways in which U S migration affects the lives of families in these two subregions Migrants from Zacatecas have traditionally come from rural areas and have gone to California and Illinois Migrants from Coahuila on the other hand usually come from urban areas and have almost exclusively preferred locations in nearby Texas The different motivations of both groups for migrating and the different economic and social effects upon their home areas realized by migrating form the core of this book The comparison also lends the book its uniqueness since no other study has made such an in depth comparison of two areas Jones addresses the basic dichotomy of structuralists who maintain that dependency and disinvestment are the rule for families and communities in sending areas and functionalists who believe that autonomy and reinvestment are the case of migrants and their families in home regions Jones finds that much of the primary literature is based on uneven and largely outdated data that leans heavily on two sending states Jalisco and Michoacan His fresh analysis shows that communities and regions of Mexico rather than families only account for differing migration patterns and differing social and economic results of these patterns Jones s study will be of value not only to scholars and practitioners working in the field of Mexican migration but also for its innovative methodology to anthropologists sociologists political scientists and historians whose interests include human migration patterns in any part of the world
