the majority of the fruit juices consumed in the United States and around the world Along with the rest of the fruit juice industry they play a major role in the entire food industry as well In spite of this prominence few texts have been written on quality control technology and most of the texts have been written by researchers who may possess great technical skill but generally are less familiar with daily routine quality control problems and concerns than quality control technologists are On the other hand quality control technologists and managers generally do not have the time and or the talent to write books or communicate through scientific literature The author recognized the need for an updated comprehensive and easily understood text on citrus quality control This text has been designed to be used not only by processors bottlers canners and others involved in the citrus industry but it can be of value to instructors and students of citrus technology Researchers also can find value in the foundations laid down by the text especially in regard to the needs and concerns of the processing industry Also consultants and marketing personnel will be greatly helped by understanding the concepts of this volume Persons in related industries also will find many applications that can be easily adapted to their needs

**Introduction to Wine Laboratory Practices and Procedures** Jean L. Jacobson, 2006-06-14 In the beginning for me winemaking was a romanticized notion of putting grape juice into a barrel and allowing time to perform its magic as you sat on the veranda watching the sunset on a Tuscan landscape For some small wineries this notion might still ring true but for the majority of wineries commercially producing quality wines the reality of winemaking is far more complex The persistent evolution of the wine industry demands continual advancements in technology and education to sustain and promote quality winemaking The sciences of viticulture enology and wine chemistry are becoming more intricate and sophisticated each year Wine laboratories have become an integral part of the winemaking process necessitating a knowledgeable staff possessing a multitude of skills Science incorporates the tools that new age winemakers are utilizing to produce some of the best wines ever made in this multibillion dollar trade A novice to enology and wine chemistry can find these subjects daunting and intimidating Whether you are a home winemaker a new winemaker an enology student or a beginning to intermediate laboratory technician putting all the pieces together can take time As a winemaker friend once told me winemaking is a moving target *Introduction to Wine Laboratory Practices and Procedures* was written for the multitude of people entering the wine industry and those that wish to learn about wine chemistry and enology *The Practitioner's manual, a condensed system of medical diagnosis and treatment* Charles Warrenne Allen, 1899
