Routledge Handbook of Latin American Politics Peter

Kingstone,Deborah J. Yashar,2013-03-05 Latin America has been one of the critical areas in the study of comparative politics The region's experiments with installing and deepening democracy and promoting alternative modes of economic development have generated intriguing and enduring empirical puzzles In turn Latin America's challenges continue to spawn original and vital work on central questions in comparative politics about the origins of democracy about the relationship between state and society about the nature of citizenship about the balance between state and market The richness and diversity of the study of Latin American politics makes it hard to stay abreast of the developments in the many sub literatures of the field The Routledge Handbook of Latin American Politics offers an intellectually rigorous overview of the state of the field and a thoughtful guide to the direction of future scholarship Kingstone and Yashar bring together the leading figures in the study of Latin America to present extensive empirical coverage new original research and a cutting edge examination of the central areas of inquiry in the region

Advancing Female Economic Empowerment and Gender Equality Charla Britt,Danielle Egerer,2024-05-24 This paper discusses connections between female economic empowerment and government spending It is an abbreviated overview for non gender experts on how fiscal expenditure may support female economic empowerment as an interim step toward advancing gender equality From this perspective it offers a preliminary exploration of key factors and indicators associated with gender differentiated impacts in each of five main categories of public spending education health capital expenditure government employment and compensation and social protection and labor market programs It examines and proposes

indices within each category that can be used to identify and measure related gender gaps and suggests associations and connections between those indices public spending and other available proxy measurements with some benchmarking potential which is summarized at the end of each category in a Gender Lens Matrix for ease of reference The paper draws on an extensive literature review and examination of publicly available datasets It also highlights and discusses gaps in data which limit gender analysis The purpose of the paper is to advance dialogue on the adoption of a gendered approach to government spending by providing a gender lens that may assist country level assessments and discussions among IMF staff and member country authorities
