psychology educational policy and politics and maternal and child health *Justice and Security Reform* Lisa Denney, 2014-01-10 Justice and Security Reform Development Agencies and Informal Institutions in Sierra Leone undertakes a deep contextual analysis of the reform of the country's security and justice sectors since the end of the civil war in 2002. Arguing that the political and bureaucratic nature of development agencies leads to a lack of engagement with informal institutions, this book examines the challenges of sustainably transforming security and justice in fragile states. Through the analysis of a post conflict context often held up as an example of successful peacebuilding, Lisa Denney reveals how the politics of development agencies is an often forgotten constraint in security and justice reform and development efforts more broadly. Particularly suited to upper level undergraduates and postgraduate students as well as practitioners, this book is relevant to those interested in security and justice reform and statebuilding as well as Sierra Leone's post conflict recovery.

Law of Electronic Commercial Transactions Faye Fangfei Wang, 2014-01-10 The development of new technologies places new challenges to the interpretation and implementation of legislation in the information society. The recent deployment of service oriented computing and cloud computing for online commercial activities has urged countries to amend existing legislation and launch new regulations. With the exponential growth of international electronic commercial transactions, a consistent global standard of regulating the legal effects of electronic communications, the protection of data privacy security and the effectiveness of Internet related dispute resolution are motivating factors to build users' trust and confidence in conducting cross border business and their sharing information online. The second edition of this book continues taking a solutions to obstacles approach and analyses the main legal obstacles to the establishment of trust and confidence in undertaking business online. In comparing the legislative frameworks of e commerce in the EU, US, China and International Organisations, the book sets out solutions to modernise and harmonise laws at the national, regional and international levels in response to current technological developments. It specifically provides information on the key legal challenges caused by the increasing popularity of service oriented computing and cloud computing as well as the growing number of cross border transactions and its relation to data privacy protection, Internet jurisdiction, choice of law and online dispute resolution. It considers how greater legal certainty can be achieved in cloud computing service contracts and other agreements resulted in service oriented computing. The second edition of *Law of Electronic Commercial Transactions* is a clear and up to date account of a fast moving area of study. It will be of great value to legislators, politicians, practitioners, scholars, businesses, individuals, postgraduate and undergraduate students. It provides in depth research into finding solutions to remove eight generic legal obstacles in electronic commercial transactions and offers insights into policy making, law reforms, regulatory developments and self protection awareness.
